MODCOM / MODULAR:
-Any MODCOM Component

-E-11 Scope

 **@302_bricks** Is this a modcom SW scope?

 **enigmabadger** Today at 8:53 AM

Sort of! It goes all the way to Will's first explorations of an E-11-inspired design. Been too many years for me to remember exactly, but I think the thought was to possibly make the scope removable to the accessory could work as both an E-11 and a Sterling SMG-type item. The concept was abandoned pretty quickly

 1 

-Railfail

•OM

-Railfail Grip (Was easy to break and prone to stress marks.)

•Regarding other attachments:

 **@Plastic Man** Were there any other attachments for the Railfail?

enigmabadger Today at 9:01 AM

I recall the grip being the only one. At the time, Will mentioned scopes and/or a M203 launcher as being possibilities, but I don't believe they were ever designed or prototyped.

-MODCOM Fused-Hartford

•OM

•Second Version

•Plain Barrel

OTHER:

-Chrome Colors that are not Gold or Silver:

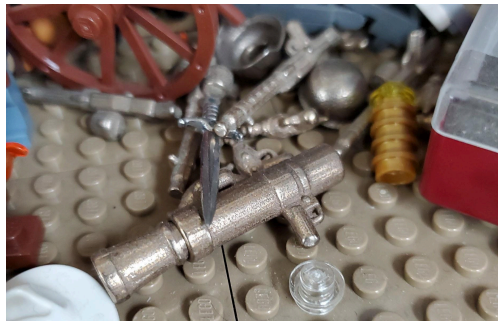

-Any BA that was printed by Will (Often in packs)
