PROJECTS

Tumblero (Rails, Backbone.js)

[Live](#) | [GitHub](#)

Tumblr re-imagined.

- ❖ RESTful JSON Rails API + Backbone.js front end for a single page app
- ❖ Combines Marionette's event-aggregator, AJAX, Redis, composite subviews, Rails action hooks and counter-caching for instant event syncing
- ❖ Beyond Tumblr: recursive nested comments, notifications, activity feed, search and sort by popularity through dashboards and blogs as well as site-wide

Chaffy

[Site](#) · [Web Demo](#) · [Android](#) · [Apple](#) · [GitHub](#)

Chat with strangers around you anywhere in the world.

- ❖ Location-based anonymous mobile chat app built in Ionic.js (a mobile AngularJS framework), Cordova, and Firebase. Google Maps API.
- ❖ Create profiles and follow chats. Live chats pulse, popular chats glow.
- ❖ Presented at Microsoft-hosted Entrepreneurs Roundtable Accelerator Aug '15.

Orgo (PhaserJS)

[Live](#) · [GitHub](#)

The classic space-shooter in PhaserJS, the popular HTML5 gaming framework.

- ❖ Multiple enemy levels and boss fights, powerups and equipment with color tracks. Prefabs and recycling keep the code modular and memory-efficient.
