

Data File: Godfrey Kagen

Name: Godfrey Kagen
Position: Internal Security
Director, North America
DOB: 17/02/1988
Place of Birth: Dover, England

Medical History: UNKNOWN
Career History: REDACTED

Currently in active duty on
Site-65. Potential anomaly,
pending investigation.

History:

Major Kagen from the British Special Air Service was inducted into the SCP Foundation following an engagement with an uncontained anomaly on the border between Yemen and Oman, where Major Kagen was officially pronounced KIA. However, he was in his wounded state transported to Site-107 where he underwent medical procedures to counteract the damage done in combat against the unlisted anomaly.

Following a long recovery period, Godfrey was given an option to return to civilian life under a new alias or resume a purposeful career within the Foundation itself. Curiosity was his achilles heel and Godfrey accepted a starting position as a General Security Guard within Site-107. After several years of service and being exposed to the anomalous world, Godfrey opted for a career change and took up a posting at Site-65, Canada, where he was brought in as an Internal Security Operative.

CONFIDENTIAL

Addendum:

Director Godfrey Kagen of Internal Security has been flagged as a possible anomalous individual. Site Command investigators have attempted to pry into Director Kagen's association with the deceased Chairman Broda Kagen and have routinely become adrift with memory fog. The link between the deceased Ascendency Leader 'Cortex' and the death of Chairman Kagen has had a direct effect on the appearance of Director Godfrey. Further investigation is to be conducted to understand the link between it all. Director Godfrey is to continue service due to continued diligent performance. Any alterations in character are to be reported.
