Show Layout
Show Trajectory
Force Visibility
Free Window Resize
No Rotation
Force Don't Enter
Force Don't Fade
Frame Stepper/Advance
No Wave Trail
Pause Countdown
Reverse Inputs
Physics Bypass
FPS Switching

Other Guidelines:

Upon Joining: Amber and Platinum do not require proof for the levels you beat before (please still submit it if you do have footage), and Sapphire does not need clicks for the same purpose. After a short period upon joining, this will not be allowed and amber onwards will always need footage. Do not abuse this when joining the private server, if a mod finds out, action will be taken.

0% Practice Mode: Completions of levels while in practice mode without any checkpoints are allowed, same goes for start positions from 0% (common when using start position switcher)

Trusted: Trusted is a role given in the server, Trusta/Krtar/Lia/Eloh personally trusts that people with this role will never hack and are exempt from proving themselves when submitting. People with the Trusted role should be aware of this and not abuse this trust.

Clicks: When submitting a level that is Platinum and above, you are required to have clicks (or taps for Android) within your completion. This is **your** responsibility to ensure that your clicks are Audible. If your clicks are not audible, your record will get denied. If you do use a Click Emulation Mod, your record will get denied

Show Hitboxes on Death: While Pointercrate does not allow this, the GDDP will allow records that use SHoD (remember, ONLY on death, hitboxes throughout the completion attempt are obviously going to be denied). Do note that if you are completing a level to submit in both the GDDP and Pointercrate, it would be recommended to follow their rules instead, as we can accept completions with or without SHoD, but high end extreme demons will be denied on Pointercrate with SHoD on.

Switching FPS mid-attempt: You must stay on one refresh rate for an entire attempt, however, a momentary switch to avoid ONLY BUGS BASED ON REFRESH RATE is allowed, but ask a list team member or owner first in the support forum. You **CANNOT** change fps to make a timing easier. Please ask the staff for more information.

GDDP Accepted LDMs: Not all LDMs or bug fix copies that are accepted by the GDDP specifically will be accepted by other lists, such as Pointercrate or the Insane Demon List. Please be aware of this and choose a version that is allowed for what lists you want to submit alongside the GDDP, or use the GDDP's if it is all you care about. **Any submissions** that are beaten in the level editor will be **denied**.

TikTok: TikTok is not a viable submitting format.

Please note, some hacks might be subject to change as more is discovered about them. If you are unsure, either DM a member of staff or submit a ticket in #support-and-suggestions.
