

Z3R0V0R0's OpenRouter + Lorebary Proxy Guide

Direct Links:

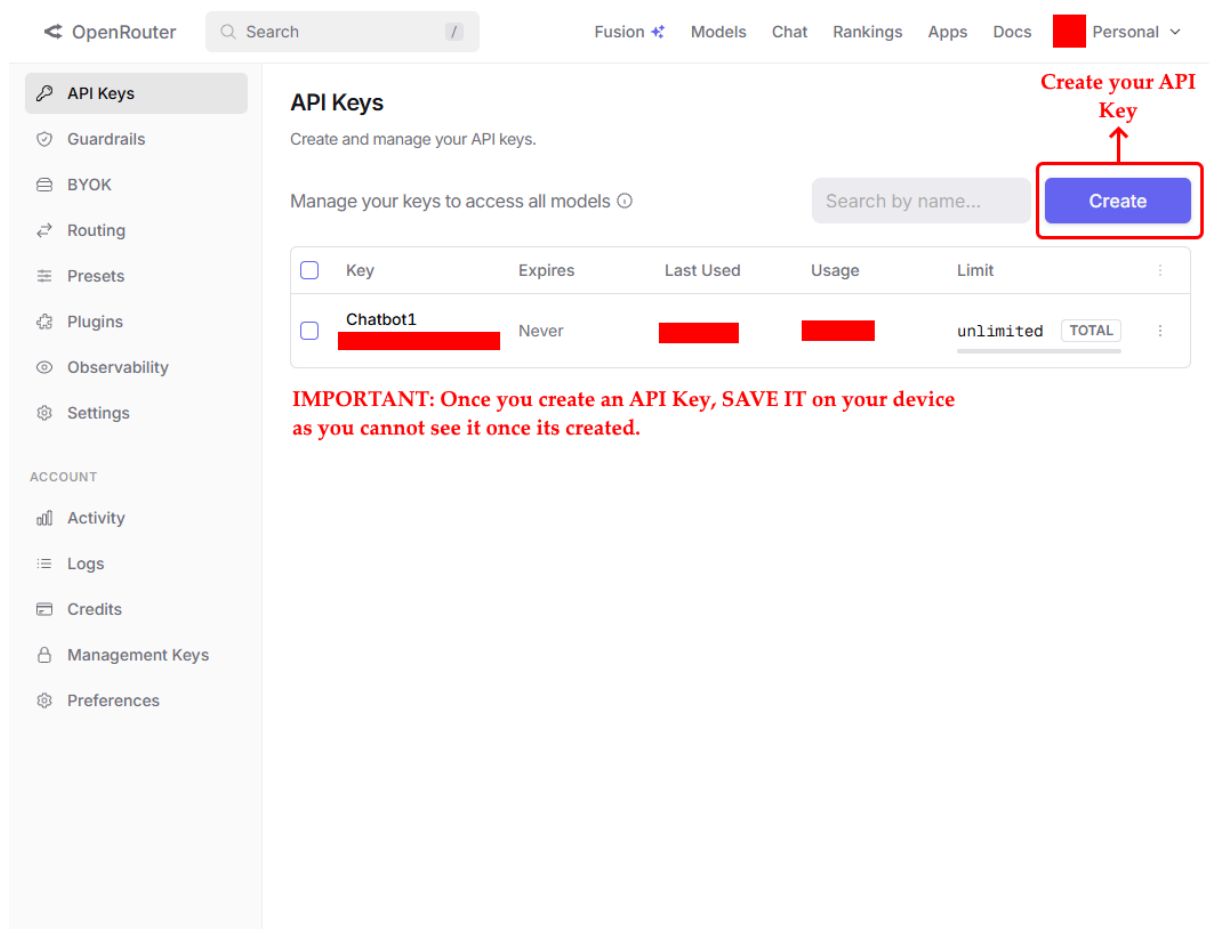

1. OpenRouter: <https://openrouter.ai/>
2. Sophia's Lorebary: <https://lorebary.sophiamccarty.com/>

OpenRouter Proxy:

On the OpenRouter page, create your account:

After creating your account, go to **"Get API Key"** on the main page, or on your profile on the right corner.

After creating your API Key, head to **“Models”**, and find the model you want.

Important: OpenRoute is both Free, and Paid.

- You can have a limit of 50 Messages DAILY.
- You can top up your account with at least \$10 in credits to use paid models, and bypass the 50 message Daily quota.

Top Free Models

(As of April/2026)

- **z-ai/glm-4.5-air:free**
- **stepfun/step-3.5-flash:free**
- **minimax/minimax-m2.5:free**
- **arcee-ai/trinity-large-preview:free**
- **qwen/qwen3.6-plus:free**

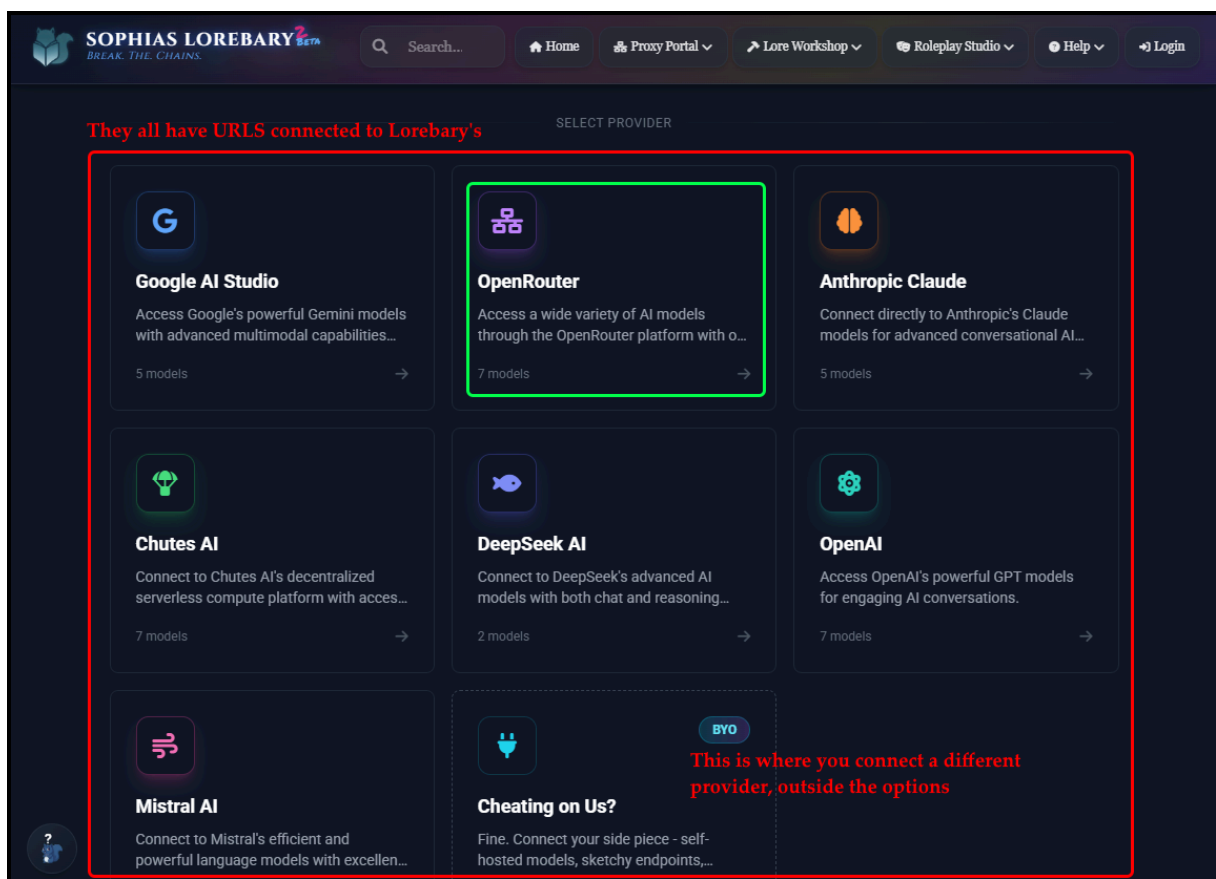

Paid Models:

- **deepseek/deepseek-v3.2**
- **deepseek/deepseek-chat-v3.1**
- **deepseek/deepseek-chat-v3-0324**
- **xiaomi/mimo-v2-flash**
- **qwen/qwen3-235b-a22b-2507**

OpenRouter URL: **<https://openrouter.ai/api/v1/chat/completions>**

LoreBary

On Lorebary, you don't require creating an accounts. Unless you want to create a custom proxy, lorebook, or plugin.

Select OpenRouter, and you have proxy URL to connect:

- LoreBary OpenRouter proxy:
<https://api.lorebary.com/openrouter>

LoreBary Prompt Commands:

<https://lorebary.sophiamccarty.com/server-commands>

You will have the option to enhance your Messages with the command prompts in order to adjust for your liking.

- Commands I personally use:
- **<NOOMNISCIENCE>** *(Characters only know what they witnessed, were told, or logically deduced. Stops NPCs from magically knowing secrets or reacting to things they could not have seen.)*
- **<NOCLICHES>** *(Kills the cringe. No more "orbs" for eyes, "shivers down spines", or dramatic monologues. Fresh expressions, simple gestures, understated reactions.)*
- **<SHOWDONTTELL>** *(Less purple prose, more action and dialogue. Cuts the fluff and gets to the point.)*
- **<BETTERSPICE>** *(Random lead-ins to romantic/sexual scenes. When spicy keywords detected, triggers scene intensifiers instead.)*
- **<OOCINJECTIONOFF>** *(Disables the automatic OOC injection that makes NPCs act independently and prevents the AI from controlling your character. Only disable if you have your own instructions.)*

Its up to your liking to find the commands which you believe can improve your experience.
