ABSTRACT (Arial 10pt)

The abstract contains a brief description of the research objectives, the location of the study, the approach or method used, data analysis tools, and important results and policy implications. Do not include formulas and references in the abstract. The abstract consists of a single paragraph and should not exceed 200 words, using a single space, Arial font, size 10pt.

Keywords **:** *Alphabetically sorted, Capitalized first word, From a to z, Maximum 5 keywords, Separate by come (,) between keyword*

INTRODUCTION

This section explains the rationale behind why the submitted article presents an interesting research study and why it is important to conduct. To address this, the introduction should include the background, research objectives, state of the art, or previous studies, allowing the researcher to highlight the gap between prior research and the current study. This gap will provide the contribution to the novelty of the topic being researched.

The references used should include at least 8 articles (national and international) published in the last 10 years. The introduction should consist of 500-1000 words. Citations should follow the body-note format in APA style, aligning with the reference list (it is recommended to use Mendeley or other reference management software). The journal should be written in Arial font, 11 pt, with 1.15 line spacing. The paper size is A4, with a 1-column format, and the margins should be 2.5 cm at the top, 2 cm at the bottom, 2.5 cm on the left, and 2.5 cm on the right. Page numbers should be placed at the bottom of each page.

RESEARCH METHOD

This section describes the research approach, the research population, sample/subjects, research time frame, data collection methods, and data analysis techniques. The research method should be explained in detail so that reviewers and readers can understand the procedures followed by the researcher, enabling others to replicate the methodology.

RESULTS AND DISCUSSION

The results and discussion should be clear, concise, and aligned with the research objectives. Researchers are allowed to combine or separate the results and discussion sections. If separated, the results and discussion should each be subtopics within this

section. The results and discussion should provide detailed findings of the research. These findings should be discussed in comparison with previous research results, highlighting both similarities and differences. Comparing with previous studies helps position the current research within the context of relevant discussions. The results and discussion section should constitute at least 50% of the total pages.

Tables should be numbered sequentially, followed by the table name (10 pt). Tables should be centered on the page. The table name and table should be separated by a space (6 pt). The table content should consist of a single row. The data or information source for the table should be listed below the table in Arial font, size 9 pt. The data source description should be provided only for tables cited from other sources, not for the author's research findings.

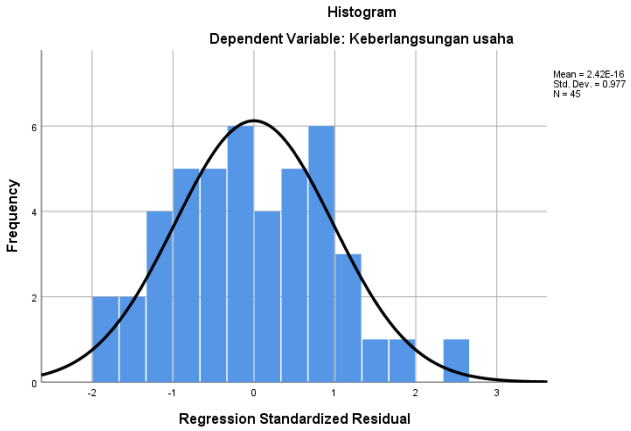

Likewise, figures should be numbered sequentially, followed by the figure name (10 pt). Figures should be centered on the page. The data or information source for the figure should be written below the figure in Arial font, size 9 pt. The data source description should be provided only for figures cited from other sources, not for the author's research findings.

Table 1. Annual Production Costs of Agricultural Business

No.	Farmer's Name	Production Cost (Rp) / Year				Total Cost
		Fertilizer	Weed Cleaning	Pesticide	Labor Wages	
1	BA	Rp 2.725.000	Rp 1.040.000	Rp 2.800.000	Rp 8.200.000	Rp 14.765.000
2	SA	Rp 2.700.000	Rp 1.000.000	Rp 2.800.000	Rp 3.000.000	Rp 9.500.000
3	JL	Rp 2.010.000	Rp 900.000	Rp 780.000	Rp 3.180.000	Rp 6.870.000
4	MM	Rp 2.430.000	Rp 390.000	Rp 690.000	Rp 3.960.000	Rp 7.470.000
5	HT	Rp 1.900.000	Rp 420.000	-	Rp 340.000	Rp 2.660.000
6	MU	Rp 9.240.000	Rp 2.340.000	Rp 35.000	Rp 37.200.000	Rp 48.815.000

CONCLUSION AND RECOMMENDATIONS

The conclusion should address the research objectives. The recommendations should outline follow-up actions (implications) based on the findings or conclusions drawn by the author. Both the conclusion and recommendations should be presented clearly and concisely.

The reference list is recommended to use Mendeley or other reference management software, with the following citation style: American Psychological Association 7th Edition (APA).
