Environmental Epidemiology		<i>ATSDR and the Utah Department of Health (UDOH) have the main responsibility of conducting Environmental Epidemiological studies.</i> DEQ Coordinate with UDOH and LHD on studies evaluating impacts on human health from the environment, when invited. Propose regulations based on findings where there is an environmental link.	LHD Provide public information based on studies to inform regional and state policy changes	No - funded by DHHS Env. Program- not subject to DEQ MPS (PB, NS, DA)
General Nuisance	Title26A-1-114	LHD Conducting necessary sanitary and health investigations and inspections on its own initiative or in cooperation with DEQ or UDOH on any matters affecting public health		Possible under the direction of the LBOH (PB) No (DA) No funding from DEQ, possible policy guidance from DHHS Yes (NS)
Health Advisories		LHD/DEQ Issue advisories that identify an immediate threat to human health in consultation with relevant partner agencies and government officials.	LHD/DEQ Provide support, consultation, and subject matter expertise regarding advisories to be issued.	Yes (NS, DA)
Indoor Air Quality- Radon -See Air Quality Table: Indoor Air Quality - Radon				
Mass Gatherings	R392-400 Temporary Mass Gathering Sanitation	LHD Coordination with event planners, plan review, permitting and sanitation inspections	DEQ Informational resource as requested by the LHD	No - funded by DHHS Env. Program- not subject to DEQ MPS (PB, NS, DA)

Meth-Contaminated Properties - See Land Table: <i>Meth-Contaminated Properties</i>				
Noise		LHD Complaints generally investigated under local ordinances or processes		No (PB, NS, DA)
Development Plan Reviews		LHD Coordinate with local Planning and Community Development Departments to ensure adequate drinking water and wastewater disposal.		No (MPS) Possible under the direction of the LBOH (DA) Ron Lund: Not sure how this is being done. "ensure" seems like a strong term that Health should be doing. Water purveyors and sewer districts know capacity. However if this is for on-site wastewater subdivision review that may just need a better header. Mylar signing? If it is that the requirement is for the water or wastewater provider to give a letter confirming availability of water and/or sewer

Public Places (General Sanitation), <i>including Public Parks, Recreation Camps, Roadway Rest Areas, RV Parks, Manufactured Home Communities, Labor Camps,</i>	R392-300 R392-301 R392-401 R392-402 R392-501 R392-800	LHD May perform safety and sanitation inspections, respond to complaints and provide public information DEQ Permit and approve drinking water and wastewater systems where applicable		No - funded by DHHS Env. Program- not subject to DEQ MPS (PB, NS, DA) Possible under the direction of the LBOH (DA) around drinking water and wastewater statement (DA) Lead Role/Responsibility language: Permit and approve drinking water and wastewater systems where applicable (DA) Ron Lund: Does DEQ exclusively permit the wastewater systems for these locations? I believe a handful of health departments permit wastewater systems, and I assume water systems that don't meet the "threshold" to be considered a public water system. Authority may need to include local ordinance/regulation

				Provide support, consultation, and referral to VSQG. (DA)
Tanning Beds	R392-700 Indoor Tanning Bed Sanitation	LHD Facility plan review, permitting and sanitation inspections per state and local regulations	DEQ <i>See Land Table: Non-ionizing Radiation</i>	No - funded by DHHS Env. Program- not subject to DEQ MPS (PB, NS, DA)

LHD general comments from Ron Lund:

- Where accepted—may want a different term, not sure.
- There are cross over where both entities are a support role and the like. How does that look?
- Authority should include local ordinances and regulations when it is stated as a support role or lead role of LHDs
- Areas that overlap in responsibility or role should include and involve LHDs in rule development.
