General Requirements

This is just a few things that everybody will definitely need to have installed/need experience with. If you don't, that's okay. There are plenty of tutorials and articles out here on these tools, and learning them and practicing them on this project will increase your skill set.

1. GitHub Account
2. Git with a client
3. Some sort of Code Editor (I prefer Visual Studio Code)

Bot Development

1. Python3
2. Reddit API
3. Pip3
4. PRAW

API Development

1. C#
2. Asp .Net Core 2.2 (might switch to 3.0)
3. Entity Framework Core
4. SQL Server (maybe, for local dev. Might have cloud DB scaffolded)

Admin/Submission Site

1. JavaScript/VueJs
2. HTML, CSS, SASS
3. Responsive Design
4. Atomic Design

Miscellaneous

1. Stack Overflow
2. Postman/Insomnia (for API)
3. Docker
4. Visual Studio (for API)
