

Science Materials in the Grade 3 Science Curriculum Letter

Dear families,

Our class will begin a new unit of study of Changes in Earth's Surface in Science. The unit involves many opportunities for students to have hands-on experience with mixing substances and chemical reactions. We are very excited about the opportunities for students to explore and learn!

Students will be experimenting with food related items, but they will NOT be consuming foods. Students will be offered latex free gloves for several experiments.

This will involve the following materials. Please notify me if your child has a sensitivity or allergy to any of the below.

√ sugar cubes	√ soil
√ corn meal	√ sand
√ salt	√ pebbles

Please return this form by _____.
