

**Note that the title should be in English and Spanish or Portuguese or French, if the body of the article is in English, the second title should be in Spanish or Portuguese or French; but if the body of the article is in Spanish or Portuguese or French the second title should be in English. n the same way they must be:**

**Table headers and  
figure legends**

**NEW RECORD OF *Sceloporus grammicus* IN BAJA CALIFORNIA**

**NUEVO REGISTRO DE *Sceloporus grammicus* EN BAJA CALIFORNIA**

**NO author nor personal information**

**Please note that Distributions notes do not have abstract nor keywords. Please also note that distribution notes do not have sections.**

References to published articles will be cited with the surname of the author or authors, and year of publication in parentheses. In the event that the article has more than two authors, the surname of the first author will be cited and “et al.” will be used. (without italics) to refer to the rest of the authors. When there are several citations, they will be ordered in chronological order first, and alphabetically after. For work in process of publication, the expression “in press” in parentheses will be used to replace the date of publication. All references mentioned in the text must be in the Literature Cited and vice versa.

Examples:

“Brodie and Campbell (1993) and Tinkle et al. (1995) demonstrated that ...”

Two or more references by the same author and year of publication must be designated in lowercase letters; for example, “Best (1978 a, b)”.

The citations are made up of the author and date (Best, 1978), in case of multiple citations, use a semicolon between them (Best, 1978a, b; Campbell, 1993; Brodie, 2000; Flores-Villela et al., 2001; Guzmán & Pérez, 2011).

All figures and tables must be referred to in the text. If they are explicitly cited, figure X or table X will be used, otherwise they will be cited in parentheses (Fig. X). If it is more than one figure, the plural will be used and following the punctuation rules (Figs. 1, 2 and 4 or Figs. 1a and 1c). Symbols, abbreviations and acronyms must be defined the first time they are used. Only italic letters should be used for species scientific names.

**No acknowledgements here.**

### **Cited Literature**

The list of bibliographic references will be incorporated at the end of the manuscript and before the figures, tables or appendices. Only list the references mentioned in the text.

References will be listed in alphabetical order of the first author followed by chronological order. In the event that there are several references with the same first author and same year of publication, these will be listed according to the alphabetical order of the second author, and so on. In all cases French indent and short dash between page numbers.

El listado de referencias bibliográficas se incorporará al final del manuscrito y antes de las tablas, figuras o apéndices. Únicamente listar las referencias mencionadas en el texto. Las referencias se listan por orden alfabético del primer autor seguido por orden cronológico. En el caso de que haya varias referencias con el mismo primer autor y mismo año de publicación, éstas se listan según el orden alfabético del segundo autor y así sucesivamente. En todos los casos se usará sangría francesa y guión corto entre los números de página. Nótese que la RLH ahora usa el **estilo APA de citas**.

For references that are in the process of being published, "In press" should be cited instead of the page numbers, and the full name of the journal should be given. Citing references in preparation will not be admitted. It is not admitted to cite manuscripts submitted without positive resolution of acceptance, unpublished reports and summaries of conferences whose resource is not available. However, if it is considered pertinent to cite them, the expression "unpublished data" or "personal communication" must be included in parentheses and their respective references will not be included in the Cited Literature.

**Tables.** Must go after the Literature Cited, each table must have its corresponding explanatory heading. Within the Table, only the initial letter of the first word will be capitalized (e.g. "Weighted average"). Lines within boxes should be avoided except when they clarify separate groups of columns. Figure footings (indicated by asterisks in superscripts) may be used after the table when detailed information needs to be given (such as levels of statistical significance).

**Description of the tables must be in English and Spanish or Portuguese as the case may be.**

**Figures.** Will be placed after the Tables if any, if not after the Literature Cited. A page will be added where the figure feet of all the figures are specified, later one figure per page will be included, listing them as Figure 1, Figure 2, etc., regardless of whether it is graphics,

photographs, maps or other graphic material. The dimensions of the figures should not exceed 21.5 x 28 cm, at 300 dpi. The figures should be planned for a reduction to a final width of one or two columns in the Revista Latinoamericana de Herpetología. A size or distance scale should be included when appropriate. If a figure includes more than one image, each one must be marked with a letter (A, B, C).

Once the article is accepted, the figures will be sent in separate files at a resolution of 300 dpi. The format of the figures must be JPG, JPEG, TIFF or EPS. It is important that, regardless of their resolution, all elements of the image can be clearly displayed.

**Figure captions must be in English and Spanish or Portuguese or French as the case may be.**

**Figura 1.** Tres especies de serpientes consumiendo tres especies de anuros en diferente estado de desarrollo: *Leptophis mexicanus* depredando un individuo postmetamórfico de *Tlalocohyla loquax* (A), *Leptodeira septentrionalis* consumiendo huevos de *Agalychnis callidryas* (B), *Leptophis mexicanus* consumiendo un individuo postmetamórfico de *Smilisca baudinii* (C), y *Leptodeira septentrionalis* consumiendo un individuo postmetamórfico de *Smilisca baudinii* (D). **Sin créditos de autor en esta etapa.**

**Figure 1.** Three species of snakes consuming three species of anurans in different development stages: *Leptophis mexicanus* preying a postmetamorphic individual of *Tlalocohyla loquax* (A), *Leptodeira septentrionalis* consuming eggs of *Agalychnis callidryas* (B), *Leptophis mexicanus* preying a postmetamorphic individual of *Smilisca baudinii* (C), and *Leptodeira septentrionalis* consuming a postmetamorphic individual of *Smilisca baudinii* (D). **No author credits at this stage.**
