

How to sync teams pushed from Sports Connect (FCLL) to GameChanger

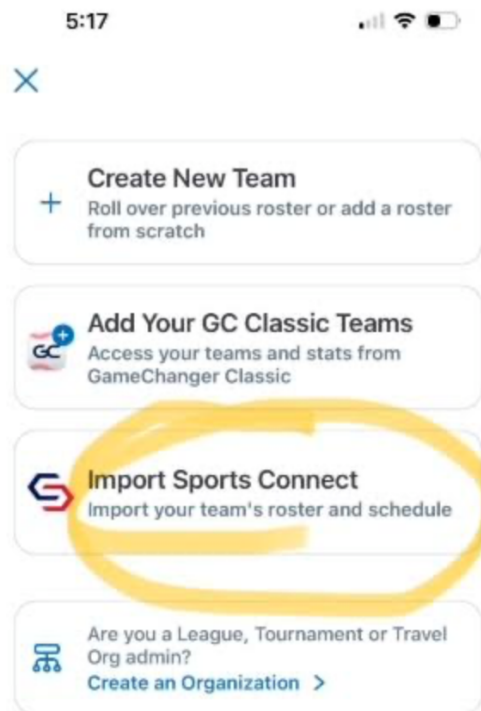

Notes:

- Any player family can import the team, not just the manager.
- Once one player family imports the team, all player families should see the team populated in GameChanger automatically. The import only has to happen once.
- Managers must be identified in Sport Connect (FCLL website) as the manager of the team. If you're not sure, see troubleshooting notes at the end.

1. Download the GameChanger app
2. Log-in or create a GameChanger account
 - a. Managers – use the email you used to sign up as a volunteer (FCLL website)
3. Click on the “+” in the top right corner

4. Click on the “Import Sports Connect”

a.

5. Your team should come up to import. If not, see troubleshooting below.

6. Your rosters and schedule will import.
 - a. Note, like all good things, the schedule will take a few minutes.

Troubleshooting:

- If the import does not work, the team manager should contact the player agents (playeragent@fcllbaseball.com and playeragent_lower@fcllbaseball.com) to check that he/she is identified as the manager in Sports Connect.
- Managers, if your spouse registered your player, you will need to go into the [FCLL](https://fcllbaseball.com) website and sign up as a team manager. Still contact the Player Agents so that they assign you to your team.
