

—SCIENTIFIC TEST REPORT—

SCIENTIST INFORMATION:

Test Number: 2

Credentials: schwimbo626

Clearance Level: **SC-2**

Department Rank: **Entrant**

Division Rank [N/A if not for BRD]: **N/A**

TESTING INFORMATION:

Class D[s]: 1 Class-D

Security Personnel: 1 CSU Ranked Specialized Agent

Mobile Task Forces Personnel: N/A

Spectator[s]: 1 SC-2

SCP[s]: SCP-207 and SCP-035

CONTAINMENT ZONE[S]: **Clean Room**

Secure. Contain. Protect

— TESTING PROCEDURE —

RESEARCH QUESTION

What will happen when a Class-D wears SCP-035 while under the effects of SCP-207? Will the kill time speed up? Will nothing happen? Will the user retain the speed effects?

— PROCEDURAL STATEMENT —

STATEMENT:

"I **Agree** that I have followed all testing procedures and regulations throughout the duration of this test. I also understand that if a breach of procedure/regulation were to occur during this test that I may and will be punished."

SIGNATURE:

I **Did Not Require** permission to complete this test. If you required permission, please place an image of the written approval below.

[Place any images of written permission, if any, here.]

—METHOD—

TESTING RESULTS:

Creating the Rationale:

When I was making my Rationale, I was thinking of a more unique test, and a combination that I haven't heard of before. I spent some time looking at the SCP directory and thinking in my head what would maybe create new information for the Foundation. After a bit of time, I settled on this Test Question

Testing:

1. First, I had to request 1 Class-D and 1 SD to site Theta. A CSU copied my request and came to Theta shortly after.
2. The CSU dropped the CD off at the Theta waiting area, where he prepared the testing room. While he was doing so, an SC-2 showed up and asked if they could spectate. I allowed them to, and we waited for the CSU to finish.
3. Once the CSU had finished preparing the room, we did scanner briefs and followed him to the designated room.
4. Once there, I briefed the Class-D on what to do, and we began the test.
5. I first had the Class-D pick up SCP-207.
6. After they had SCP-207, I had them drink it and show me that they had the effects.
7. Next, I instructed them to equip the mask.
8. After about five seconds of wearing the mask, the Class-D had died, even with the CSU attempting to revive them, it was to no avail.
9. After taking in all my observations, I concluded the test.

—RESULTS—

CONCLUSION:

After the research I conducted, my conclusions are as follows:

When the Class-D equipped SCP-035, while under the effects of SCP-207, they turned a sort of lightish red, and then the Class-D died very quickly, in approximately 5

seconds. Before dying, Class D still retained the increased speed gained from SCP-207. It seems that SCP-207 does not just have the effects of increasing the user's movement speed, but also can affect other elements. This research also shows how the time SCP-035 takes to kill can be changed. Further testing is needed to see how SCP-207 can decrease the needed time for things, as well as seeing if the time it takes for SCP-035 can not just be increased, but also decreased.
