

Movement Weaver application: Stephen Reid

[Role description and accountabilities](#) →

From June-August 2020, I attended 1-2 Hypha meetings/week, most often the Whole Systems Integrator meetings, as I came to understand the SEEDS/Hypha ecosystem. I also had a number of one-on-one calls with people including Rieki Cordon, Franz Josef Allmayer, Joachim Stroh, A. Keala Young and Stephan Osmont.

Following that period of research, I built SEEDS payments into the [Dandelion](#) ticketing platform (of which I am the lead developer) using the [newdex.io](#), [coingecko.com](#) and [caleos.io APIs](#), making Dandelion the first events platform to take payments in Seeds.

As SEEDS draws closer to its full launch, I am keen to step properly into a Movement Weaver role.

I anticipate my first major tasks in the role will be to:

- educate and onboard the 80,000 users of Dandelion, which has an [outstanding Alliance proposal](#)
- help launch the RenaissanceU project, a seven-week, better-than-free course in the Regenerative Renaissance, focused on solutions and platforms that can be used and enjoyed right now for healthier, happier lives and the healing of the planet. [See draft proposal here](#)

You can read more about my background and skills at <https://stephenreid.net/> and <https://stephenreid.net/services>. I also write a monthly newsletter at <https://stephenreid.substack.com/>.

It has been a pleasure to get to know the talented Hypha team and I would feel enormously proud to join.
