What does it Say, Mean, Matter Blog

We Should Hang Out Sometime by Josh Sundquist is a non fiction book, who follows this guy who is trying to find out why he has never had a girlfriend, so he finds everyone he had a crush on and talks to them to ask why. I would give this book a 6/10 because it was interesting to start, but it got really repetitive. I would recommend this to really anyone, because it doesn't have a specific genre.

I inferred that he liked just having a crush on people, more than actually dating them. I think that is important because that isn't his main reason at the end, so it shows that there is always more than just 1 big reason why he never asked/dated anyone. I think the author has some bias against himself, because he was reflecting on when he was younger, and a lot of people think they are very cringy when they were young, and it doesn't always perfectly reflect what actually happened. One thing I got out of this book is that you should just go for it, because rejection in middle/high school won't affect you anywhere else in life. Another thing I got out of this was that it's ok if they don't have a crush on you, you can move on. It's not good to try to force them into having a crush on you, or believe that they do.

I think the reader would care about this as it is a common problem for a lot of people, and people wanna know what is going wrong. I think this book is important, but it depends on the person. It matters because I feel like a lot of people could have this problem, but don't know what to do about it, and this book gives one of the solutions/diagnoses the problem.
