

This is an example of raw content blocks in Cloudpress and Sanity. Below is the JSON for a Geopoint.

```
@@begin_raw_content
{
  "_key": "43898233bd25",
  "_type": "geopoint",
  "lat": 13.736717,
  "lng": 100.523186
}
@@end_raw_content
```

If we want to include more than one element, we must ensure they are wrapped in a JSON array. For example, here is an array containing the JSON for both the geopoint and the file.

```
@@begin_raw_content
[
  {
    "_key": "43898233bd26",
    "_type": "geopoint",
    "lat": 13.736717,
    "lng": 100.523186
  },
  {
    "_key": "cb8195537099",
    "_type": "file",
    "asset": {
      "_type": "reference",
      "_ref": "file-1f59e84376b2acda296b1b431a16e5cd5dfb7da8-pdf"
    }
  }
]
@@end_raw_content
```
