Trigger/content warnings: mentions of racism, mention of NSFW content, drawn gore imagery

This document will cover the actions of the person known as Arichiino (aka Lee or Scotty.) Arichiino is a Dutch artist that is mostly active in various Roblox fandoms (Such as: Forsaken, Phighting, Die of Death, and BrawlR) as well as multiple other non-Roblox fandoms. For a short amount of time, they were also a member of the Legend of the Domino Crowns development team, but were soon fired after being caught stealing artwork.

This document does not encourage harassment to any party mentioned in any shape or form. This document is only to raise and spread awareness of their actions.

I (Merenq) am not responsible for other people's actions, and it's ultimately up to the reader to decide what to do with the given information. I would appreciate it if you read the document, quietly block Arichiino on socials, and share the document further.

Thank you to the people that have provided images for the document. If you have additional proof or know an artist that had their work stolen, please DM me on Discord (merenq) or Telegram (cosmicTangent).

He also has a Tumblr account, but as of current we do not know the username.

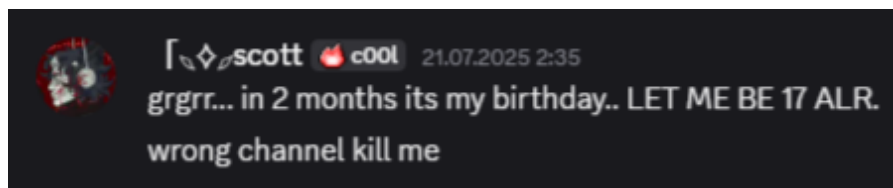

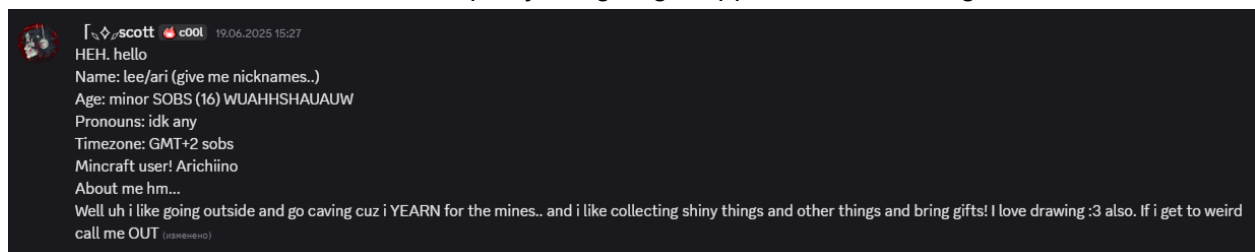

Lying about their age

Arichiino has lied to people about their age, potentially putting themselves in danger in spaces that have suggestive/NSFW topics.

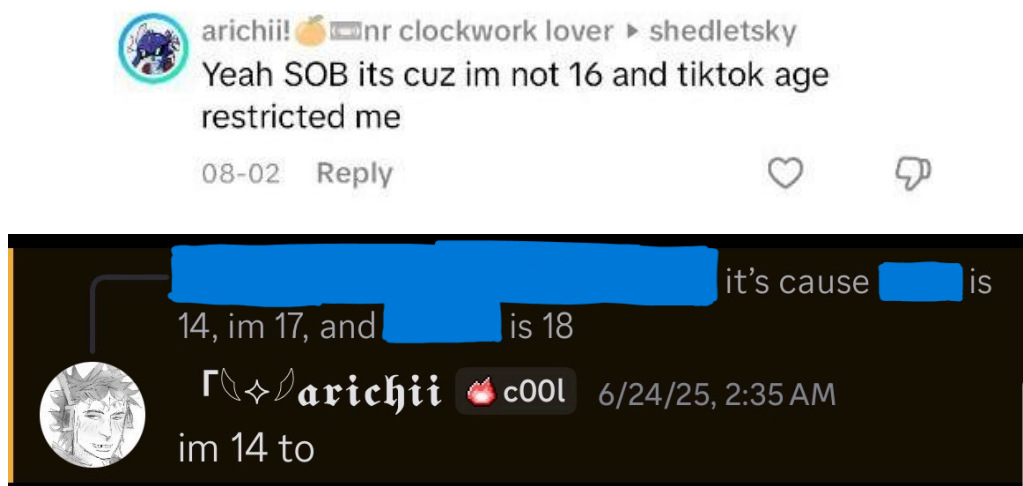

For example, Origins SMP (a Discord/Minecraft server that I co-own. It will show up later in the document again) had a rule regarding the players age: everyone had to have been *at the very least* 16 years old due to the suggestive nature of some jokes and topics that were allowed, given that most of the players were adults. Anyone under the age of 18 also could not gain access to the NSFW channel role, which was given out manually by the admins to those who listed their age as 18 or over in the introductions channel.

Ari, of course, wasn't given the NSFW role due to their age, but jokingly begged for it multiple times while playing Minecraft, even though the answer was always a firm "no." He has also requested suggestive/NSFW artwork from artists despite their discomfort.

Below is the intro that Ari filled out upon joining to get approved on the Origins SMP.

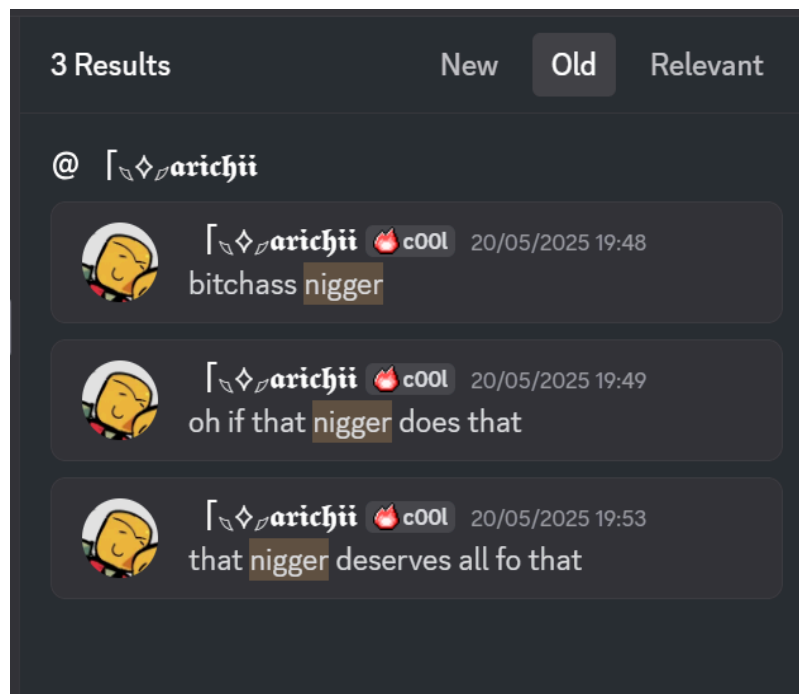

However, it is evident that they have lied about their age. Below is the screenshot from their TikTok account's (@anoboq) comment section and their dms, openly stating that they are not 16 and are instead 14.

Usage of slurs

Much smaller part of the document, but Arichiino has been caught using slurs that they can not reclaim.

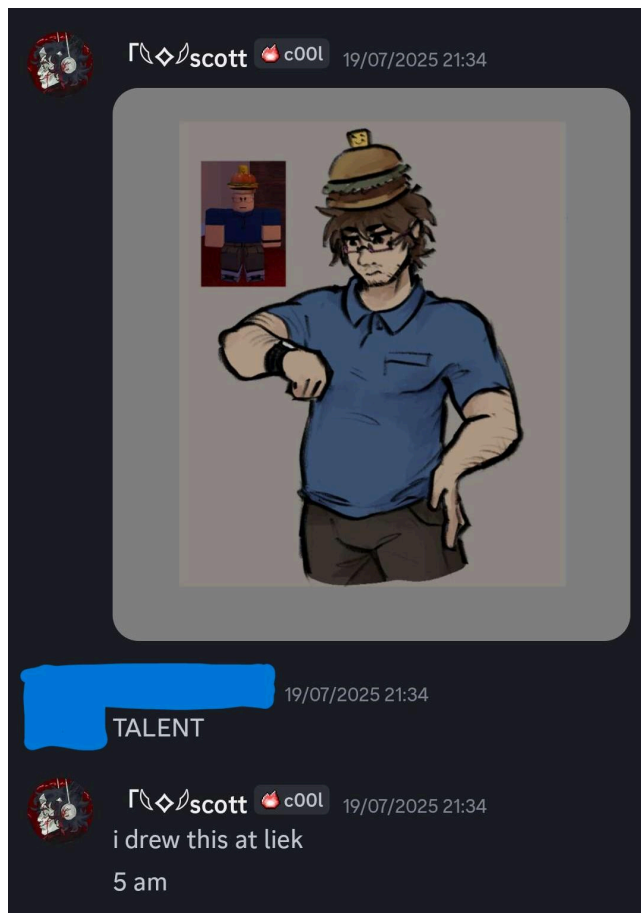

Art theft

This part will include all of the screenshots where Ari has claimed to have drawn works taken from others. Credit will be applied under images if and when possible. Certain names and messages are censored due to requests for privacy.

Although it cannot be shown here, Ari has stolen artwork of an NSFW artist and claimed to be them. They shared this art amongst other minors (which the original artist is uncomfortable with.)

There is artistic nudity further down on this page. If you don't wanna see it feel free to click off after seeing the main section + Exxcidio's art theft section.

Im figuring out how to hide more watermarks in my drawing cuz i do NOT want my shit to get stolen again

There are 2 hidden watermarks rn

scott cool 31.07.2025 19:24

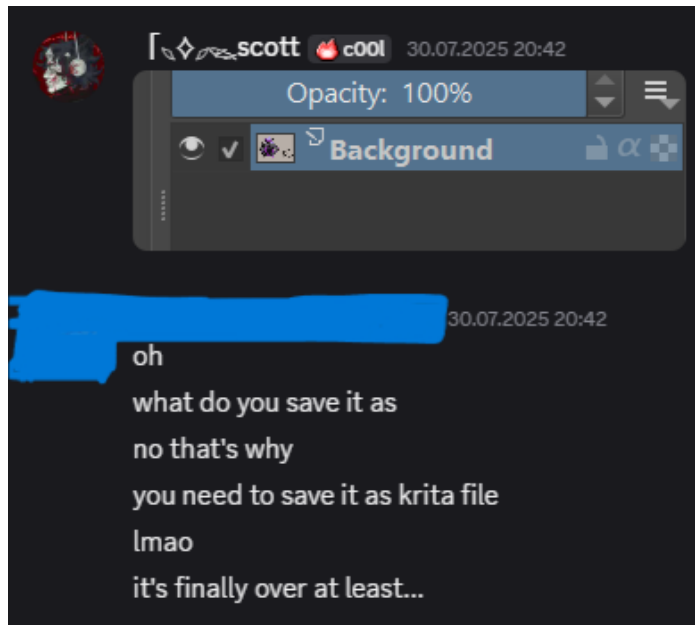

HIHI

so funfact

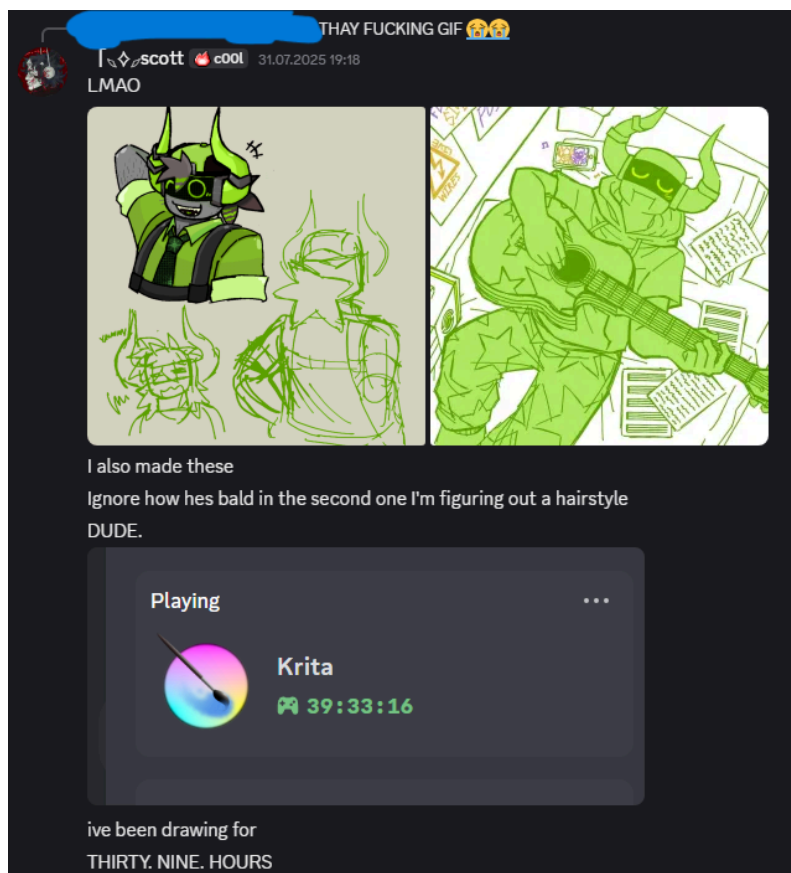

my banhammer art started off as a wip r34 drawing i planned on making but scrapped it cuz i didnt like the uhm part this one

(Original artist is deadmeatboar on Twitter (NSFW). Ari has removed the NSFW part, stating that he scrapped it because he “didn’t like it”. Though I speculate he did it to post it to the Art channel for Origins SMP, as he didn’t have the NSFW channel role ^)

(I questioned this part, because drawing for multiple years without knowing how to save a file in a format specific for Krita is suspicious ^)

(Original artist is daily-boombox-drawings on Tumblr)

Speaking of katana im NEVER finishing this wip

My oc orison..

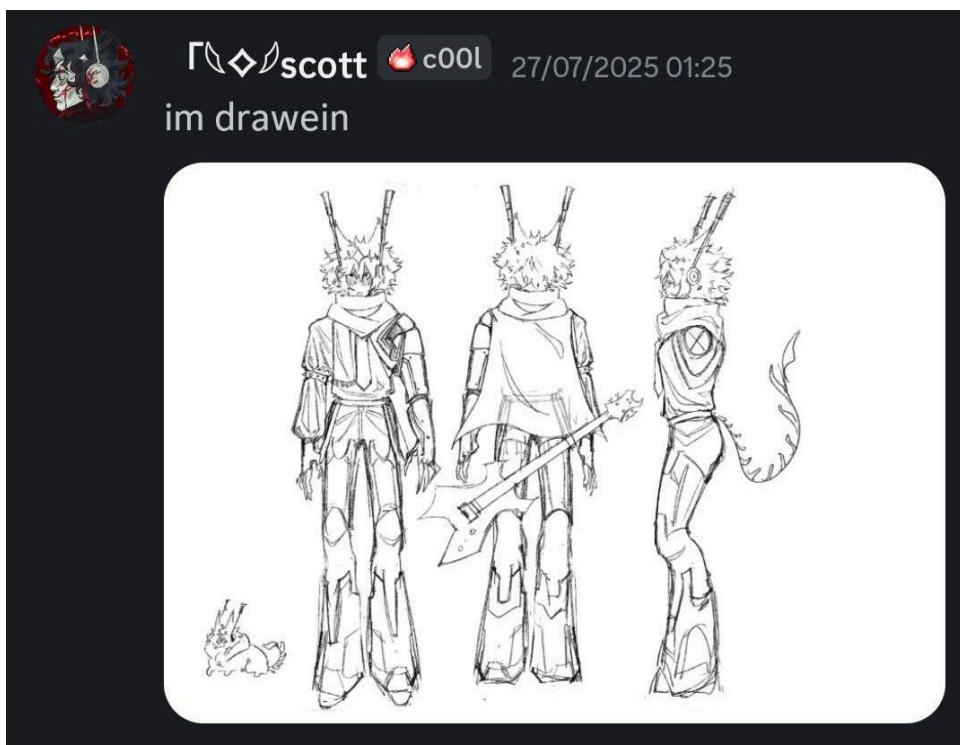

ORISON CONCEPT ART

Somebody drew him a ref... IM DROOLIJG

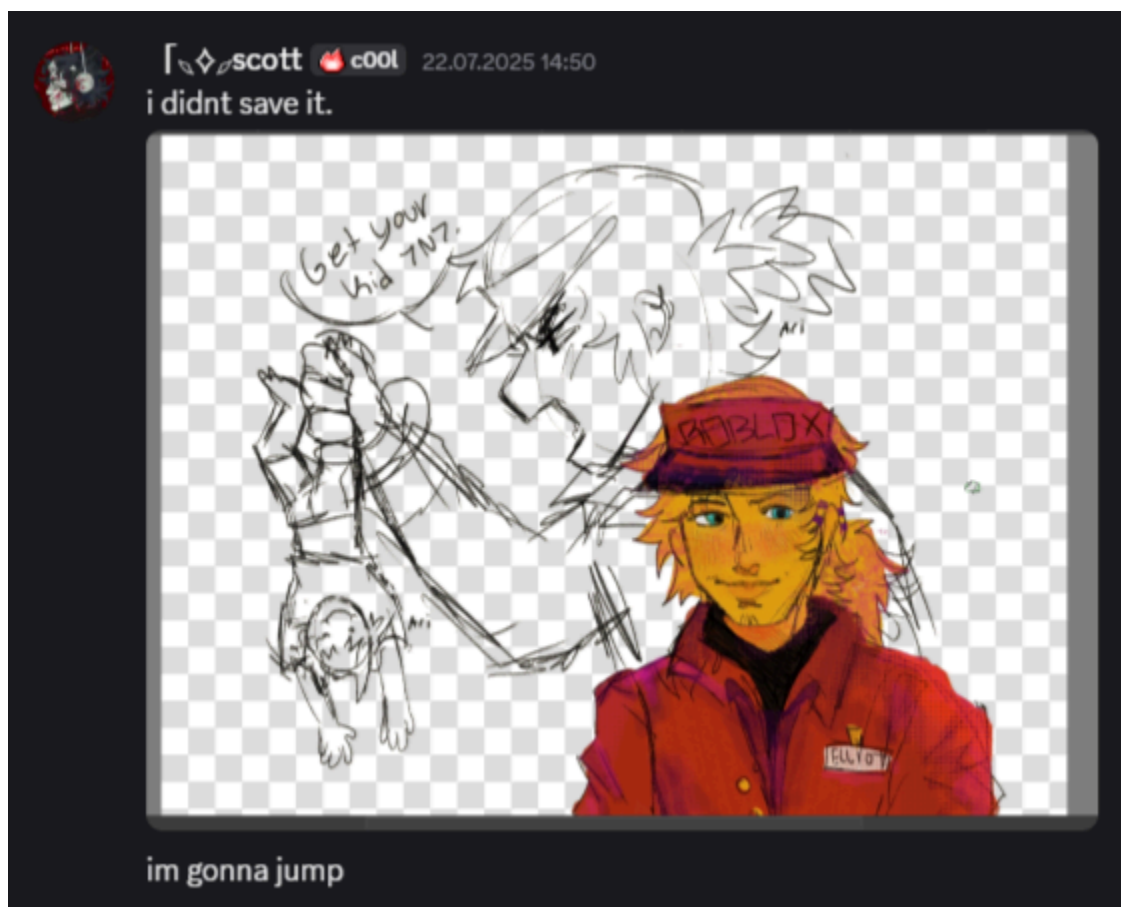

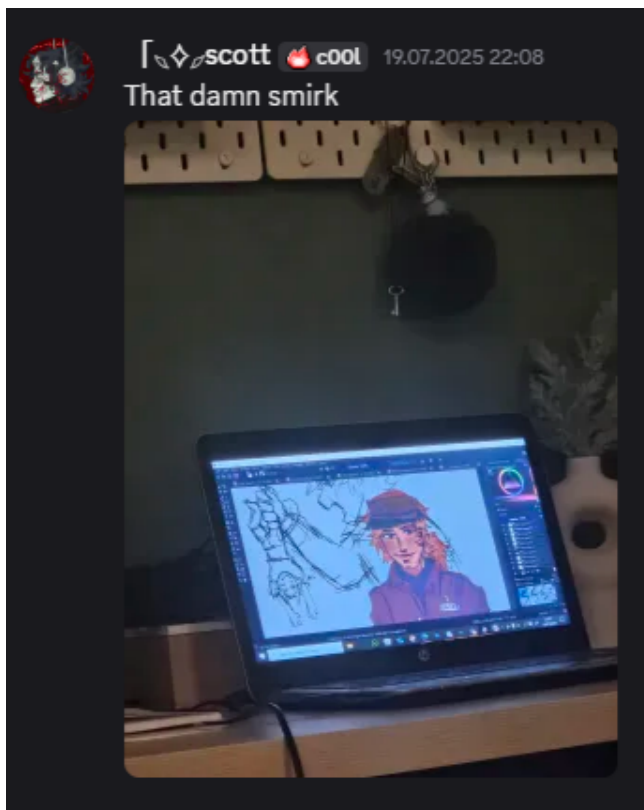

(These two images are related. Note how Ari confirmed that LazyDes (office siren man) was the one who made the reference for Orison, but claimed to be drawing it when talking to another person. ^)

(Him "forgetting" to draw hair ^)

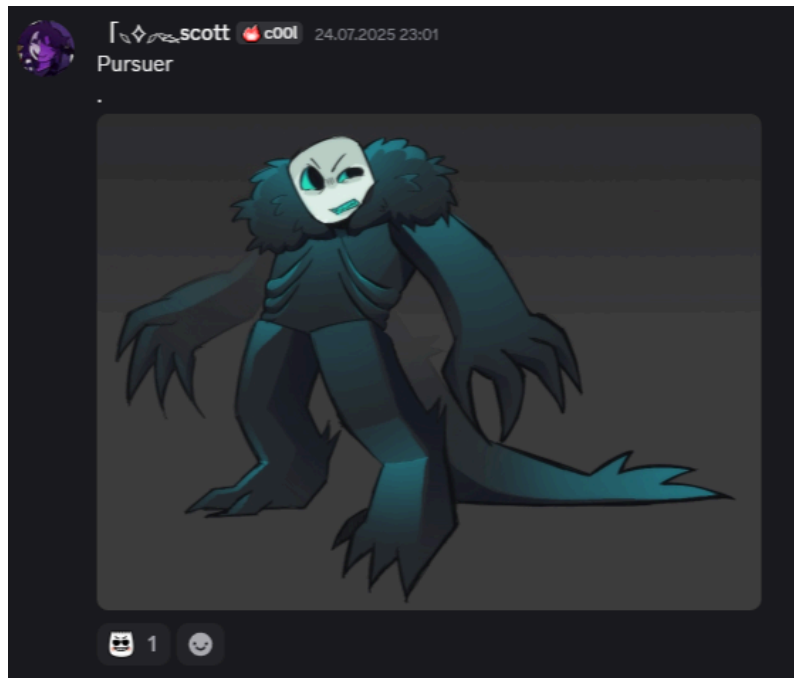

(Note how he doesn't have a drawing pad anywhere near the laptop. He also has claimed many times to be drawing with a mouse/trackpad, which is very doubtful considering the obvious pen pressure on many works he has shown ^)

(Pretty clear that it's traced ^)

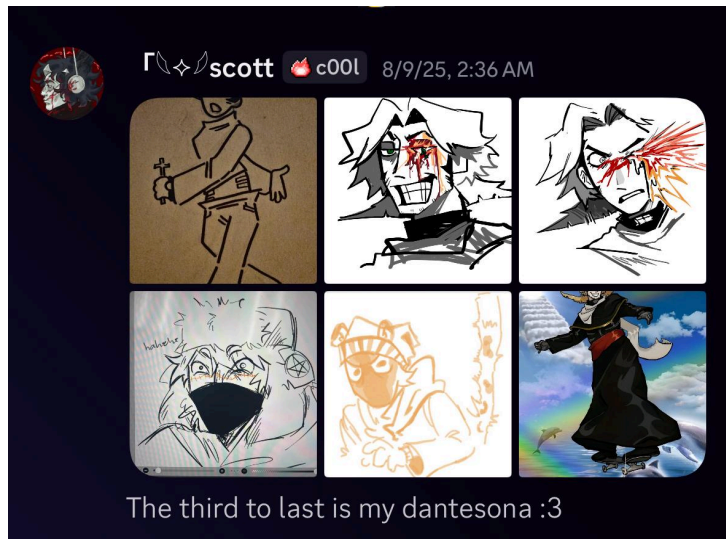

(Original artist from the image on the right is hereicomeworld on Tumblr ^)

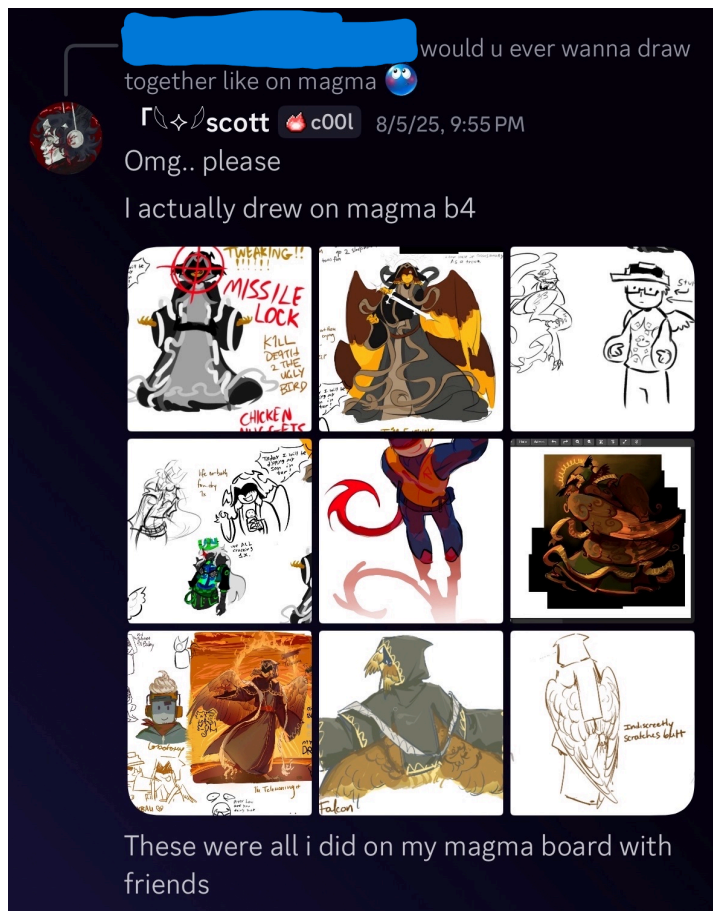

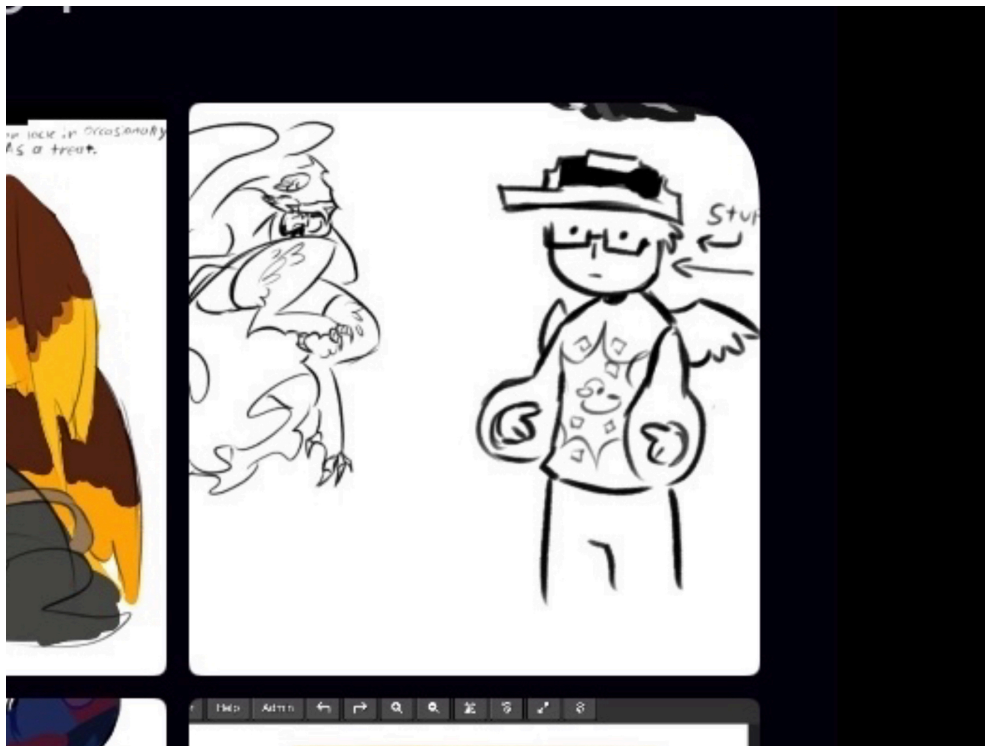

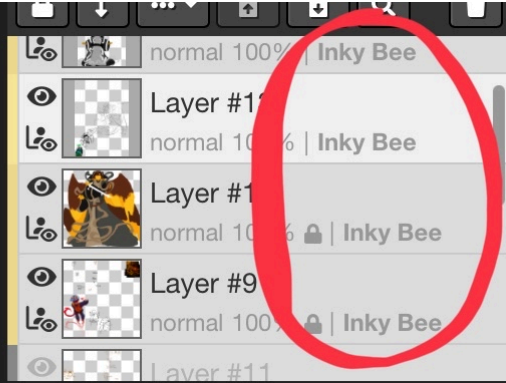

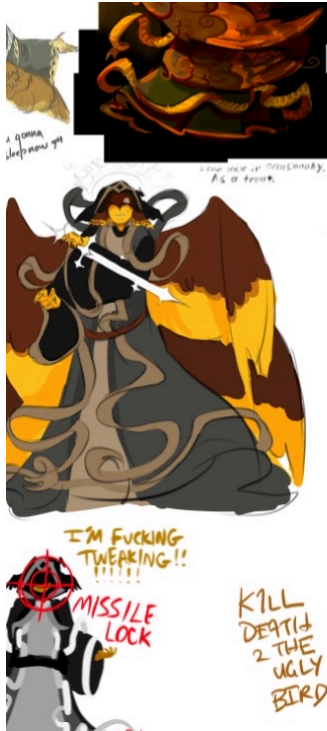

(Original artist is 0exia on TikTok ^)

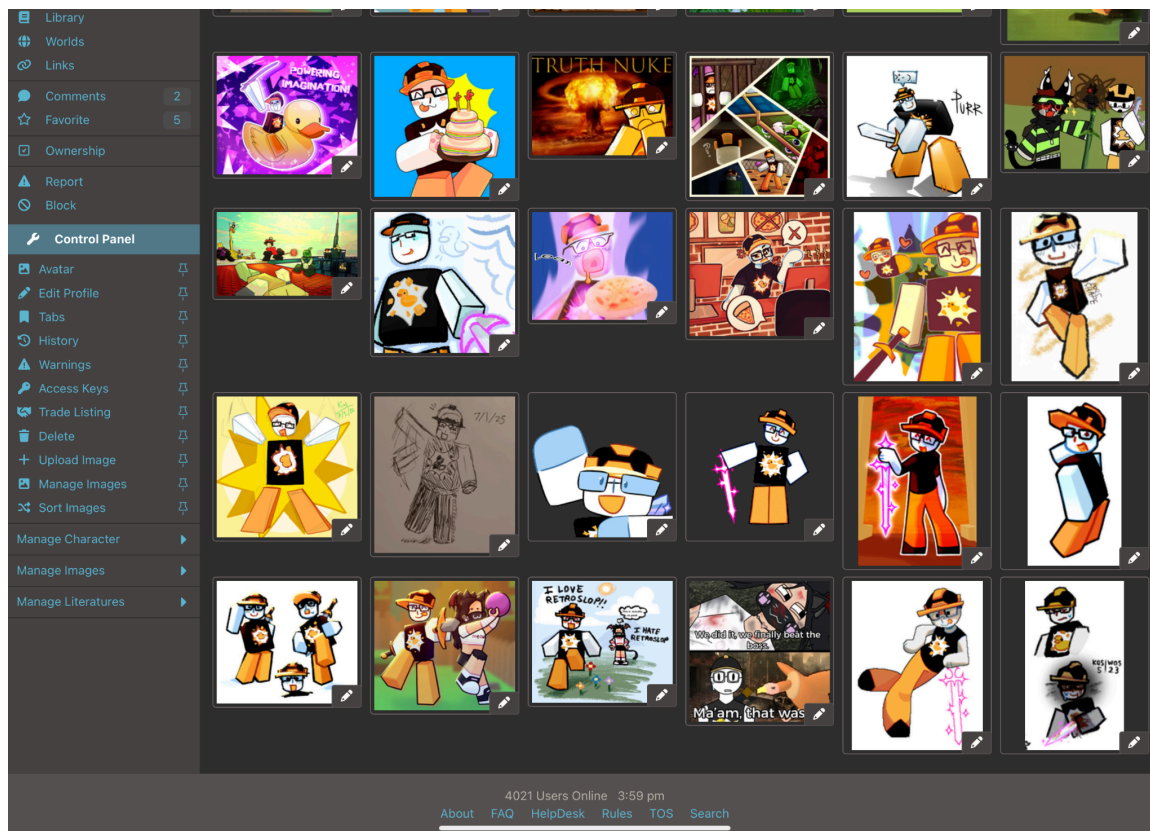

The next image will have some drawn gore/injury, so feel free to skip.

(Original artist is YOGOVUCHI on Twitter/X ^)

(Original artists are InkyBee_ and 134958O2 on Twitter/X. You can even see Inkybee's OC in some of the images ^)

Now, this part is related to the Origins SMP server specifically.

Ari claimed to have drawn his AU's design for Clockwork, but it clearly doesn't match the description he has given in his introduction for the character.

name: clockwork :3
 origin: valkyrie
 info!!! (the best part)
 hes part harpy eagle!! so hes part avian to!
 his tail is REALLY sensitive and will not like it when it gets touched since it makes him feel uh things
 hes a robot! so he moves pretty statically
 he LOVES shiny things , preferring lapis lazuli and diamonds for their striking blue color
 he absolutely LOVES swimming and fishing
 because hes part avian he has a stronger connection to birds then other creatures, so he has alot of bird pets
 he gets really embarassed to bring gifts because he tries to gather the perfect things, and will gather more if its not enough
 he talks with his hands ALL the time
 he doesnt hear well, but his sight is unmatched (maybe by telamon outmatched tho)
 mining and swimming are his favourite things to do
 he LOVES eating pancakes

interacting with others is another thing he absolutely adores
loves collecting music discs cuz he can feel the vibrations of music
does silly dances, cuz yk birds do them to (not romantically, especially when music plays)
his gloves overtime shaped around his talons so his hands are pretty sharp
his wings (aka the elytra , sad they cant be customized) are pretty fluffy and gradually slim
downwards but are still verry strong, he uses them to hug others/warm others)
hes really cold but the feathered parts (head crest, wings, etc.) are pretty warm and form
some sort of comfort for him)
THATS ALL I GOT SO FAR

scott cool 26.07.2025 5:25

okay holy shit

nikos clockwork design

is almost EXACTLY how i imagine him on the origins server

NIKKO THE UH

tiktoker/artist

but replace the red wings with harpy eagle ones and give him eagle features/feathers

I have highlighted the part of the description that does not match with the art. Most if not all of the avian features are missing. Of course it could've been just a change of plans, but Ari has mentioned the said traits even after that, and they're rather important given the origin that Clockwork has in this AU. This had raised a few questions for me, but I didn't say anything.

scott cool 31.07.2025 11:42
OH YEAH WIP CLOCKWORK FROM LAST NIGHT

Im finally working on his origins design

IM DONE BTW

(Original artist is rblxmaxxing on Tumblr for this one. Note how this was piled up as another reference for Origins! Clockwork, yet has drastically different shapes, such as: valkyrie, pauldrons, glasses, headphones, hands, tail ^)

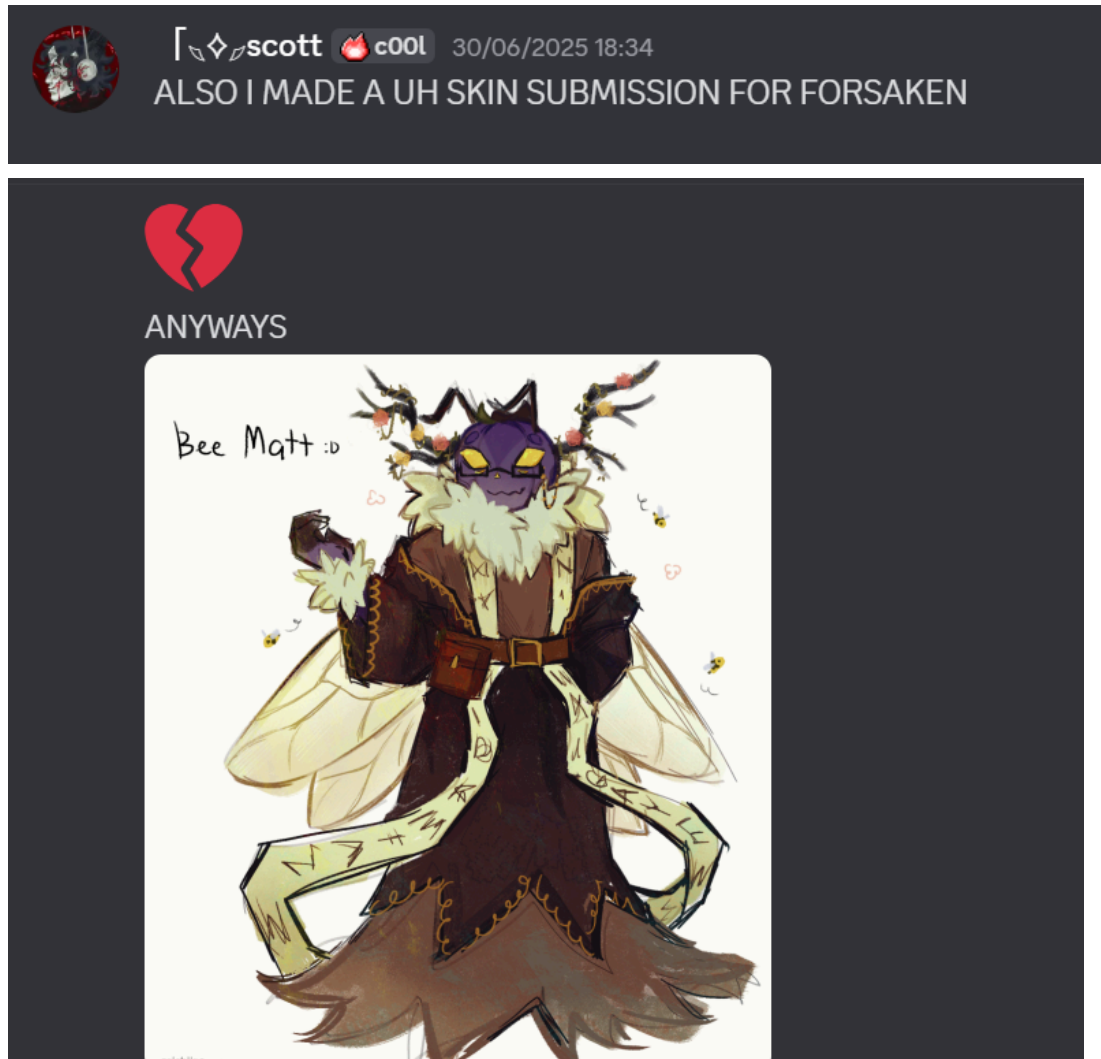

The next screenshots will be covered separately as I'm personally familiar with the original artist, Exxcidio, and it also has to do with the Origins SMP for the most part.

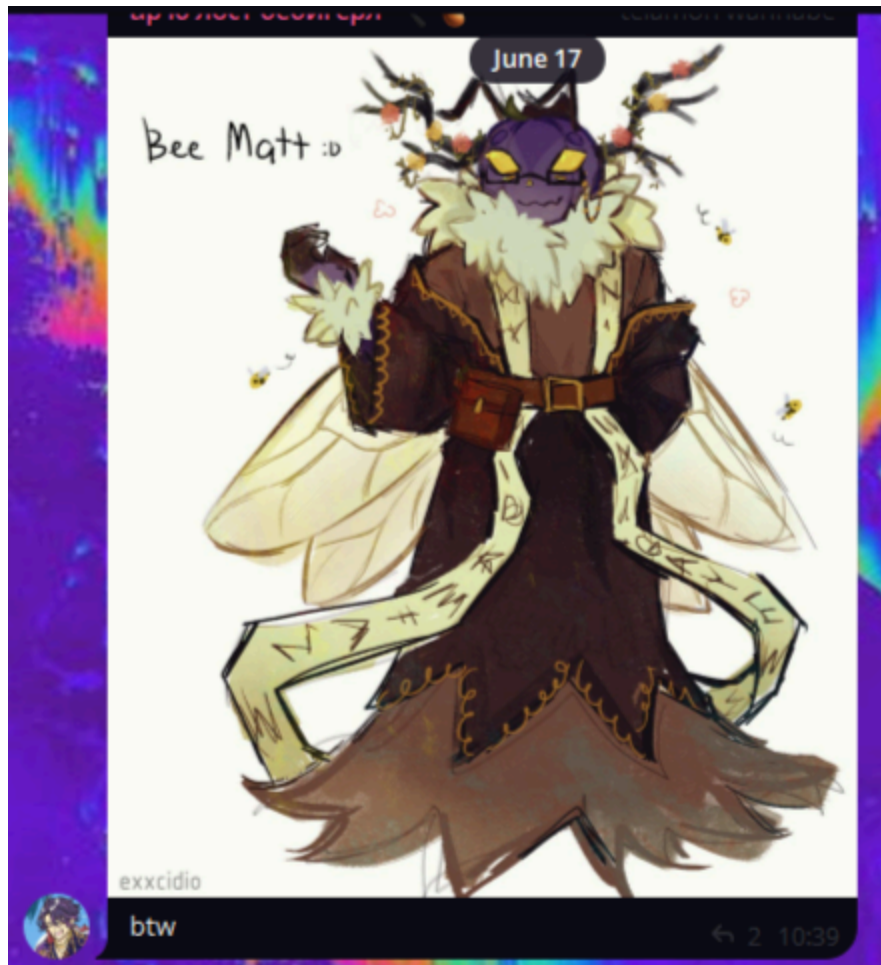

(Arichii didn't even bother with covering up the link to Exxcidio's Strawpage on the image ^)

Next, he claimed to have made a skin submission for Forsaken. Here's the issue: the skin submissions closed a long time ago, roughly around the end of March when there was a raid on the Forsaken Discord server and the channel was deleted.

Another point is that the stolen art below was made specifically as a reference art for Origins! Matt Dusek, where he is a half-bee. And the entire idea of Origins AU and server wasn't even a thing until June.

(You can barely see that he even replaced Exxy's signature with his own ^)

(This is a screenshot from one of my personal chats with Exxcidio, where you can see that it was shared on June 17 ^)

scott 🔥 c00l 21/06/2025 11:00

ITS FINE!!

I JUST WOKE UP

im drawing

(Another art for Origins AU with all of the players we had at that time. Worth noting that Exxcidio draws in Clip Studio Paint, not Krita ^)

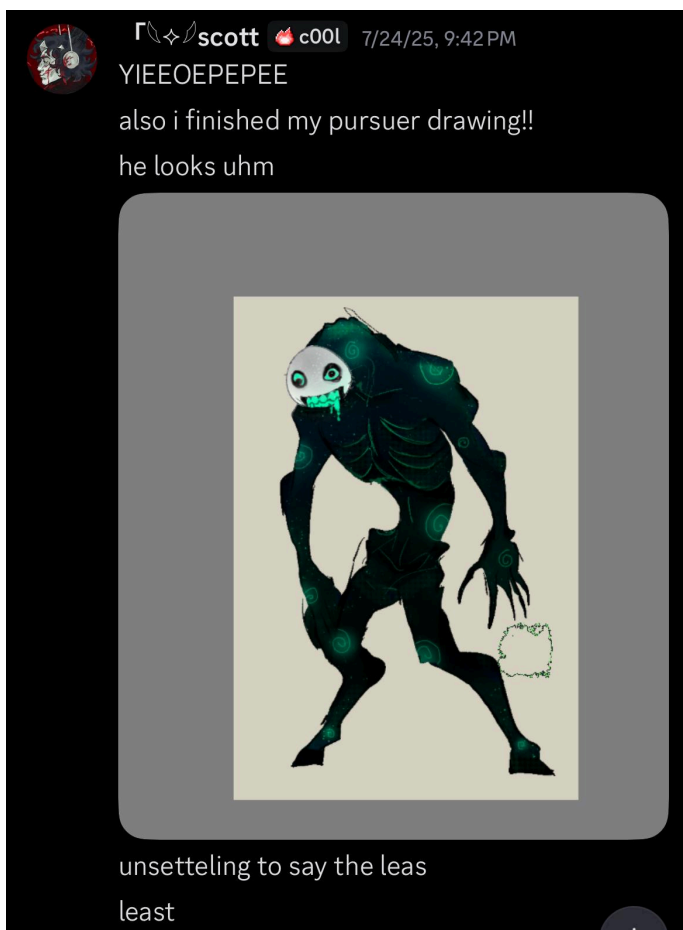

THE telamon 21.06.2025 6:38

wip....wip thingie...

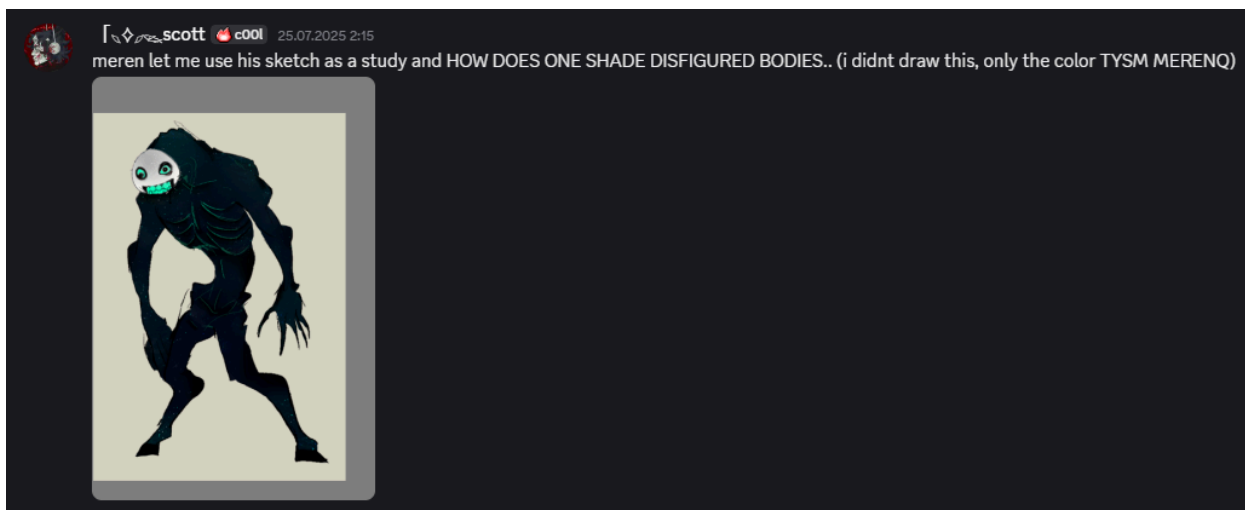

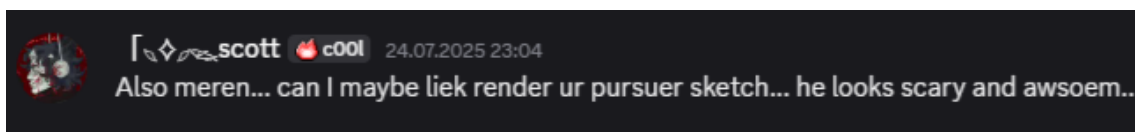

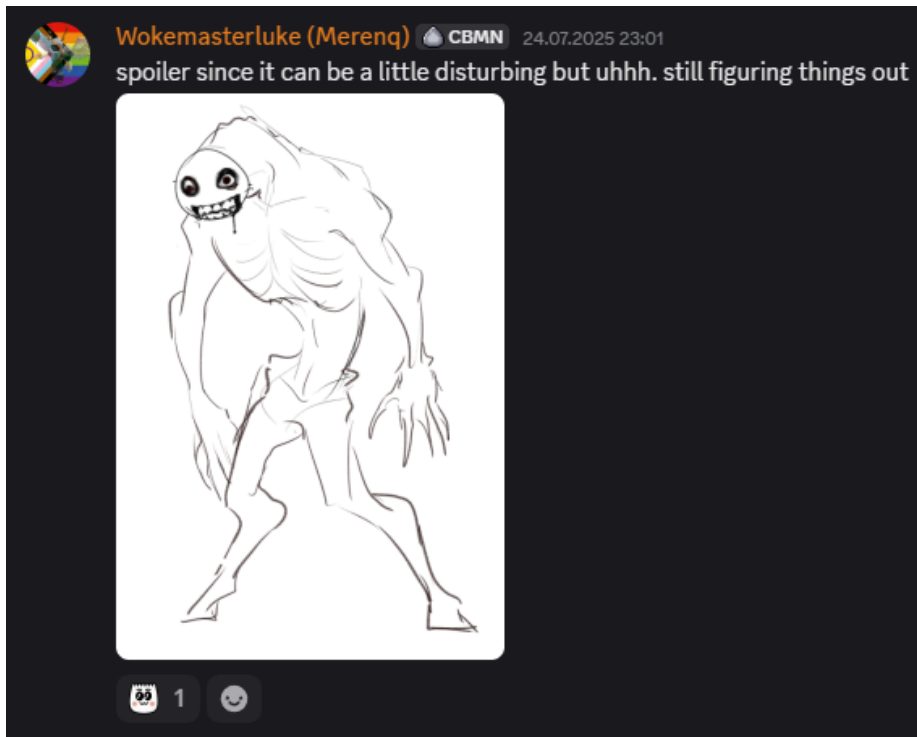

(Exxy originally sharing the image ^)

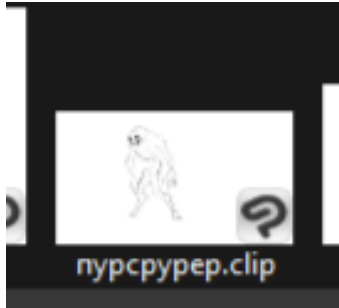

Ari has also stolen my (Merenq) art in some cases. This section has artistic nudity below, so go to the next tab if you're uncomfortable with it.

(These are the screenshots where he claimed my art as his ^)

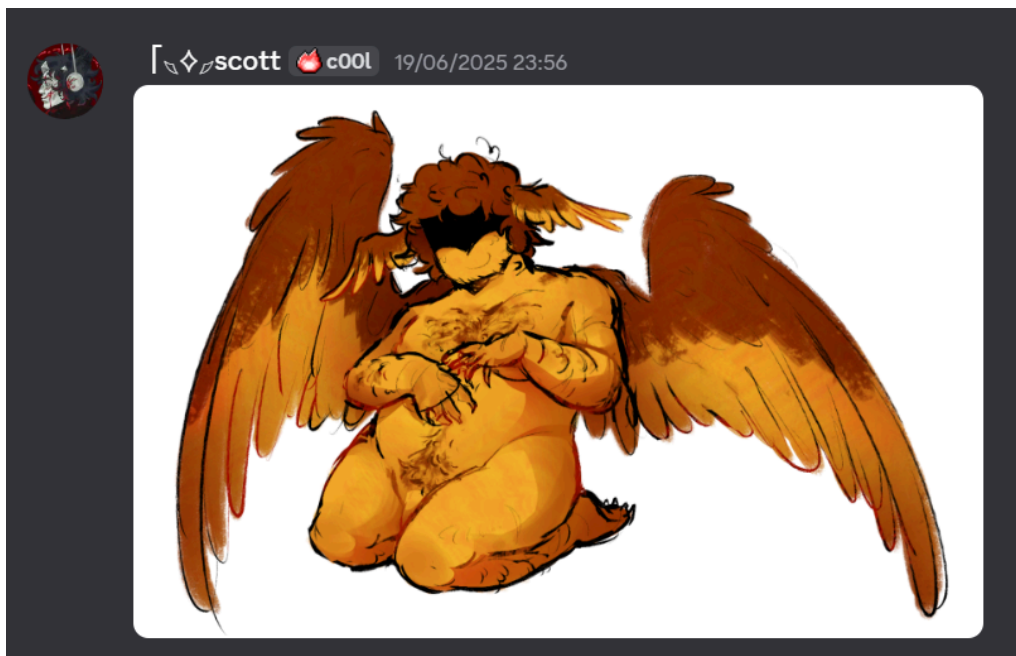

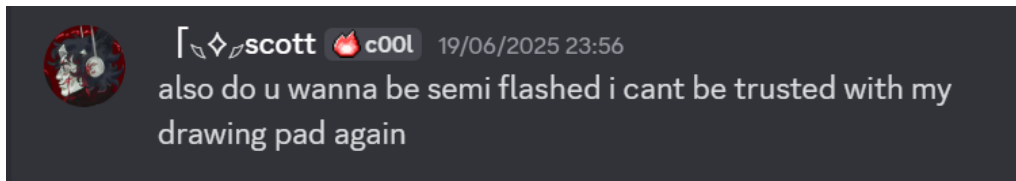

(Me sharing the sketch, and Ari asking for it to be used as a study ^)

(Proof that the art is mine, I draw mostly on Clip Studio Paint and have speedpaint for a lot of my art ^)

Next Ari has claimed my Telamon art as his. This piece was made with no sexual intentions in mind (and I have openly stated it), as I wanted to practice drawing bodies and rendering. He, however, has said that he will “semi-flash” someone with the said drawing, giving it a suggestive/sexual undertone.

(This was him sharing it around an hour after I've shared it on the Origins SMP server. Below will be the proof against it ^)

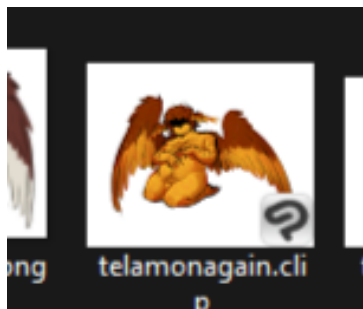

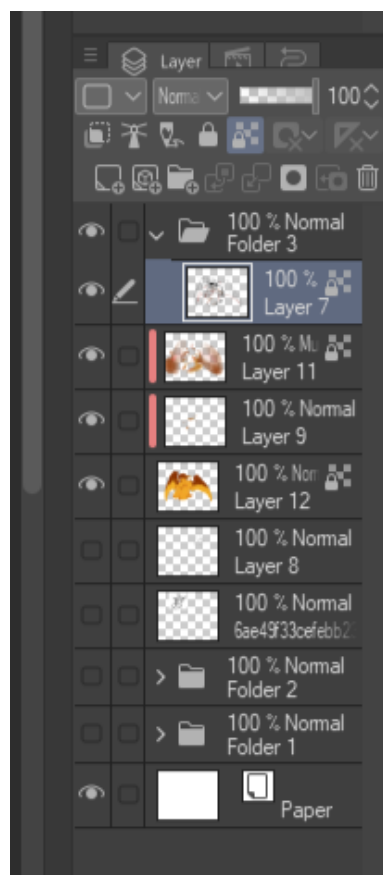

telamon's primary victim CBMN 19.06.2025 22:46

non sexual nudity warnin!!

bwom

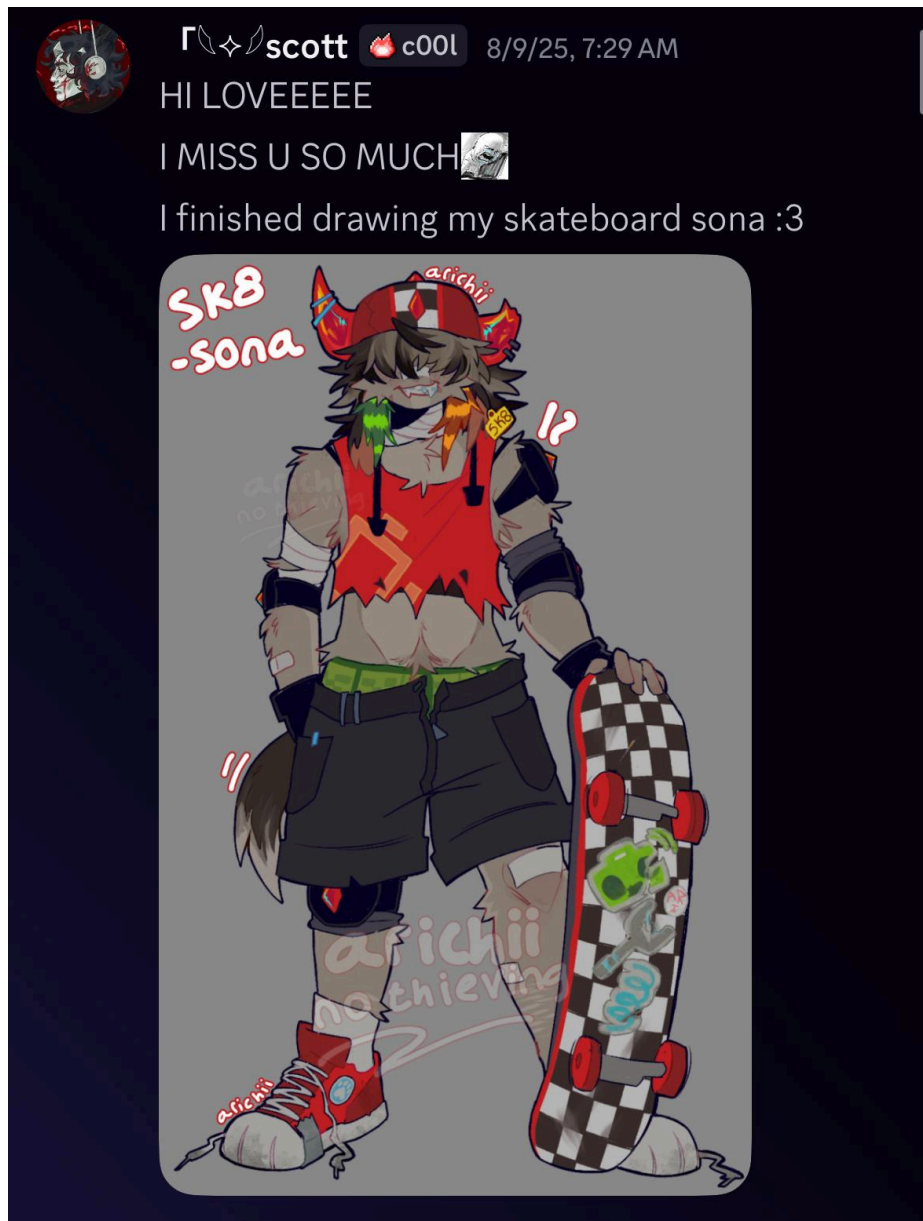

might render it idk

(Proof that the work is mine. I also have a speedpaint for this ^)

OC theft

Arichii has also been stealing other people's OCs and giving them different names, lore, and descriptions. Some of them have been uploaded on ArtFight, which is against the site rules (they have been reported, but there has been no feedback for weeks).

scott 🔥 c00l 8/12/25, 1:26 AM

Sirry im awake. And ill be truthfully i didn't draw the skatesona one yes ik(but ive got permission to use him AS my sona design) and yes, the twitter+Tumblr are mine and honestly I should've given u my real ones BUT im awake and can be able to show more proof if needed im really sorry

(Original artist is microwavesteaks on Pinterest ^)

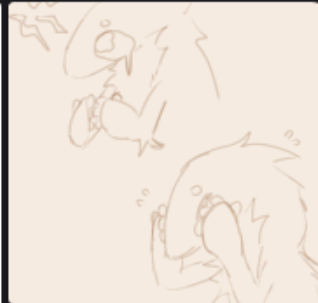

scott 🔥 c00l 03.07.2025 9:57

i mean this dood doesnt rllly need a ref

scott cool 29.06.2025 13:31
the creature...

this is them btw

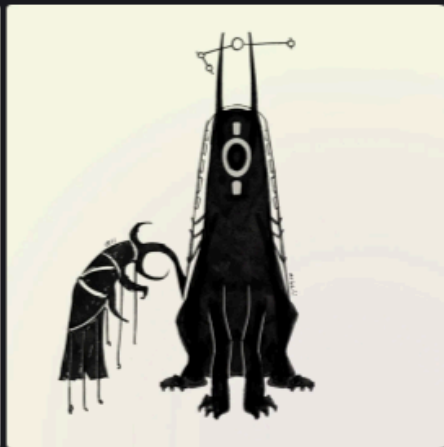

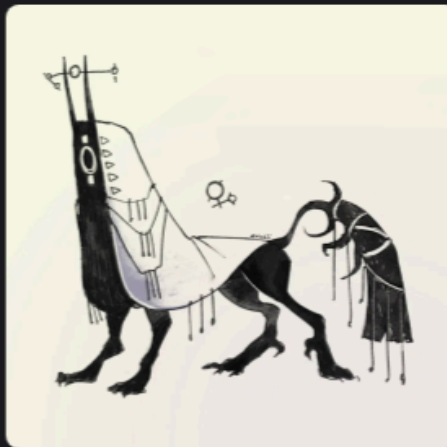

(Original artist/owner is reyzer_aski on TikTok)

Next is the biggest OC theft issue (which has led to the whole investigation), where Ari has stolen from a small creator, rewriting the lore and going as far as pretending to have the original artist's account.

scott cool 01.08.2025 12:34

Do we fw my new oc

Thinking of calling them lurinkaep

Or something..

Idk

scott cool 01.08.2025 12:39

OH MY GODD

They can have 3 forms

I didn't draw the third yet

Beast, humanoid, and spectral

Spectral is where they possess a cloud/airplane/bird to watch others

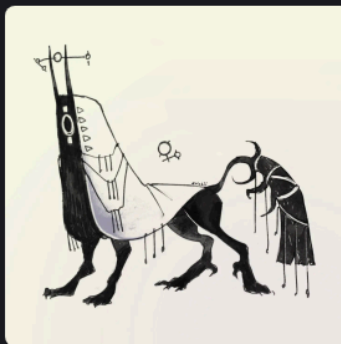

And they WILL stalk you and never let gk

Go

scott cool 01.08.2025 12:43

And they weave their blankets from different strands of peoples hair they stalk

SHOWW

Well if they do fight

Lurinkaep cant touch them

They went as far as uploading the said OC to ArtFight. Although reported twice, there has been no feedback so far: [Art Fight - Character : Lumikan](#))

The original artist is nora.neart on TikTok. Below I provided a screenshot of their page. In one of the videos, we can clearly see that the UI on nora.neart's videos has the language set to Ukrainian (as well as replies to Russian and Ukrainian comments), while Ari has openly stated that he's Dutch, and has mentioned it on his TikTok page. He does not speak Russian or Ukrainian, as on Origins SMP (where a majority of the players speak Russian) we had to use English whenever Ari was around so that he'd understand us.

(Here you can clearly see the Ukrainian text ^)

(Screenshot provided by Inkybee_)

Here you can see that Ari faked having the nora.neart and daily-boombox-drawings accounts. Worth noting that Ari *could* have shown proof if he had any. My DMs are always open, he had access to them, and I happen to be on the dev team for Legend of the Domino Crowns. The claims on speedpaints and sketches are also false. He never sent any of the speedpaints to anyone despite claiming to have them.
