Trello: https://trello.com/b/kUzdcSyx/project-3-group-1

Organization: Adopt-A-Pet

Overview: Redesign the Adopt-A-Pet, a pet rescue organization based in Mount Prospect, Illinois. Ensure that the website is easy to navigate and their call to actions (i.e., donate/adopt) are featured.

Prospective User: Someone who is interested in adopting a dog or cat, or at the very least getting involved with the org through donations or volunteering.

1. User-focused inspiration/motivation (why you feel it's valuable to help your chosen cause or why you want to redesign the app or website)

   Adopt-A-Pet helped pioneer the "shelterless shelter" approach to foster care back in the 1980s. Since then, they have placed over 11,000 dogs and cats into their forever homes. Such an amazing, innovative, and vital organization deserves a website that helps them further their mission and improve the lives of countless animals, owners, and volunteers.

2. Task breakdown with estimated dates (ownership by members)
   a. A link to your project Gantt sheet
      i. Instructions: 22.1- Final Project 3 Gantt Chart.docx
   b. A link to your Trello board (optional)
