<https://github.com/cfoster121>

<https://cfoster121.github.io/portfolio-3>

Front End Developer passionate about developing innovative technology to make a lasting impact on our communities. Self-starter and problem solver with a desire to continuously grow. Confident in making strong contributions to cross-functional, dynamic team projects.

---

## Technical Skills

React, React Hooks, MERN Stack, frontend framework (Handlebars / Bootstrap / Tailwind CSS), Responsive Website Design, PWA, JSON Web Token JWT, Chrome Developer Tools, JavaScript, Javascript libraries, Typescript, Python, HTML, XML, CSS, ES6, Command Line, Data Structures, Algorithms, Object-Oriented Programming, Service Oriented Architecture, Git, GitHub, Relational Databases, SQL, MySQL, NoSQL databases, MongoDB, PostgreSQL, Apollo Client, Apollo Server, Apollo GraphQL, REST APIs, JQuery, JSON, AJAX, Express.js, Node.js, Jest Unit Testing, Insomnia, Postman, ServiceNow Platform, ServiceNow Applications

## Project Highlights

**Social Network API** | <https://github.com/cfoster121/social-network>

Utilizes MongoDB to perform CRUD actions for a social networking application

**Employee Tracker** | <https://github.com/cfoster121/employee-tracker>

CLI application to perform CRUD actions utilizing MySQL

**Quizinator (Collaborative)**

<https://github.com/cfoster121/quizinator> | <https://quizinator.home.jgarrettcorbin.com/>

Quiz game utilizing MySQL, Handlebars, Bcrypt, and user authentication

**Astronomy Dashboard (Collaborative)**

<https://github.com/cfoster121/astronomy-dashboard> | <https://dazedchou.github.io/Astronomy-Dashboard/>

Web page displaying weather and astronomy information based on location. Created using TailwindCSS, server side APIs, and third-party APIs.

## Education

**Full Stack Coding Bootcamp**

UC Berkeley Extension

**Bachelor of Science in Biology (Physiology)**

Sonoma State University

## Experience

### NextGen Program Extern

October 2023 – December 2023

ServiceNow

Remote

- Demonstrated proficiency of knowledge of the ServiceNow platform and products via instructor-led and on-demand coursework, case studies, and projects during a 10-week interactive reskilling program.
- Conceptualized and configured custom applications within multiple ServiceNow instances using form configuration, scripting, Service Catalog configuration, Web Services, Homepage, Dashboard, and Service Portal.
- Developed application that decreases the response time of customer feedback. Tool also served to increase customer satisfaction ratings over time.
- Managed team project using Agile framework to create project plan, define roles, and determine tracking metrics to ensure a cross-functional understanding amongst project members.

### Software Engineer Intern

August 2022-November 2022

Astren

Remote

- Work across the full stack, building highly scalable distributed solutions that enable positive user experiences and measurable business growth
- Develop new features and infrastructure development in support of rapidly emerging business and project requirements
- Assume leadership of new projects from conceptualization to deployment
- Ensure application performance, uptime, and scale, maintaining high standards of code quality and thoughtful application design
- Work with CI/CD Agile development methodologies, adhering to best practices and pursuing continued learning opportunities
- Participate in all aspects of Agile Software Development framework life cycle including design, requirements gathering, code reviews, implementation, build process, testing, and deployment
- Architect, develop and provide guidance on building end-to-end systems optimized for speed and scale
- Able to develop full stack web, cross-platform mobile app primarily in HTML, CSS, JavaScript, React.js
- Collaborate cross-functionally across time zones

### Emergency Department Medical Scribe

June 2020-Present

Vituity (El Camino Hospital)

Mountain View, CA

- Follow all rules and regulations for HIPAA compliant healthcare setting
- Accompany physicians and advanced providers during patient encounter in fast paced, high stress environment
- Adapt to regular changes in patient flow volumes due to COVID-19 pandemic
- Document complete patient encounters including HPI, ROS, and physical exam findings
- Epic EHR to verify pertinent past medical, surgical, social history, and medications
- Regularly track orders and results to help maintain patient flow and have charts completed prior to patient admit or discharge
