Chioma Nkem-Eze

Paris, France
fegaeze@gmail.com

As a Software Engineer with 5+ years of experience, I specialise in building scalable, high-performance web applications.

With expertise in frontend technologies like React and TypeScript, and experience collaborating closely with UX teams, I ensure that solutions are both technically robust and user-centric.

I'm committed to creating work that not only meets technical requirements but also drives measurable business outcomes.

TECHNICAL SKILLS

JavaScript, TypeScript, React JS, React-Native, Redux, Next JS, Jest, React Testing Library, HTML5, CSS3, SASS, Tailwind CSS, Git, Webpack, Agile Methodologies

EXPERIENCE

Dashlane, Paris — *Software Engineer (Web)*

JANUARY 2024 - PRESENT

- ❖ Delivered high-impact features and platform enhancements across onboarding, account restrictions, employee invites, and admin flows—leading technical investigations, UI implementations, and cross-functional collaborations that advanced user experience and product goals.

- ❖ Improved application stability and maintainability by migrating legacy components (e.g., design system, onboarding guide), reducing technical debt, resolving critical bugs (accessibility, extension flow, CSV import), and revamping UI testing frameworks to enhance onboarding reliability.

Bally's Interactive, Tallinn — *Frontend Game Developer*

JUNE 2023 - NOVEMBER 2023

- ❖ Collaborated on the enhancement of two distinct games, focusing on layout and sound, leading to improved player engagement and higher satisfaction.

- ❖ Contributed to the development of Fire Chariot's first playable build, working closely with frontend engineers, artists, and other stakeholders to ensure smooth progress and meet key project milestones.

Quidax Technologies, Lagos — *Frontend Engineer*

JANUARY 2020 - AUGUST 2022

- ❖ Implemented a KYC reward program, as well as a cryptocurrency staking vault, enhancing user engagement and providing secure ways

LANGUAGES

English (Native)
French (A2)

for users to earn rewards through digital asset staking, directly supporting business growth objectives.

❖ Led the development and launch of the Qdirect and Mono transaction frontend flows for web and mobile platforms, which were critical during a period of governmental cryptocurrency restrictions and significantly increased platform adoption.

Voyance, Lagos — *Frontend Engineer*

MAY 2019 - DECEMBER 2019

❖ Developed and integrated interactive data visualisation interfaces using modern JavaScript libraries (e.g., D3.js, Chart.js), enhancing data interactivity and enabling the real-time rendering of complex datasets.

❖ Built a modular component library for data visualisations, utilising reusable React components to standardise UI components across applications.

Softcom Limited, Lagos — *User Interface (UI) Engineer*

JUNE 2018 - APRIL 2019

❖ Developed intuitive web app interfaces and websites for **Eyowo**, Softcom's flagship fintech product, focusing on optimising the user experience.

❖ Collaborated with the UX team to design and maintain a comprehensive design system and style guide using Jekyll, enhancing design consistency and reducing development time.

EDUCATION

University of Tartu, Estonia — *MSc, Software Engineering*

AUGUST 2021 - AUGUST 2025

Joint master's program with Tallinn University of Technology (Taltech) Thesis: AI for Special Education - Solving Mathematical Word Problems with Conceptual Models Approach Using LLMs.

Bloom Institute of Technology, USA — *Fullstack Web Development & Computer Science*

AUGUST 2019 - APRIL 2020

BloomTech is a 9-month immersive coding bootcamp that prepared me for a successful career in software engineering through a project-based learning approach.
