

Labor Stages & Cervical Dilation

SKETCH & TELL

Review the provided [resource](#) to learn about each stage of labor, including what happens at each stage and the size of the cervix (dilation) at that point.

Use the template to organize and sketch your work. Make sure each section is clearly labeled with the cervical dilation size (cm), and the corresponding object illustrations. All work must be done in color. You will need to include 9 illustrations—***so you may eliminate 7 cm or 9 cm...you decide.*** Be sure your sketches and labels are neat, easy to read, creative and colorful!
