Why Your Audience Will Care

The Big Idea

Most AI site tools stop after generating a website. Agentic Sites connects the whole journey: business brief → plan → brand → site → growth → lead discovery → audit → personalized pitch.

- No coding or design skills required — users start by describing the business.
- AI creates a Master Plan and Brand Kit before the build, so the site starts with structure and consistency.
- Visual SiteBuilder keeps the user in control of the final website.
- Free hosting is included, with subdomain publishing and custom-domain support.
- Lead Finder helps surface local businesses that may need a better website.
- Website audits + opportunity scoring help prioritize prospects.
- Personalized pitch generation helps users start client conversations faster.
- Commercial Rights let buyers build for themselves or sell sites to clients.

WHAT AFFILIATES CAN LEAD WITH

Fresh Promo Angles

The “Build + Find Clients” Angle

Don’t promote it as another AI website builder. Lead with the bigger workflow: it builds the site, then helps identify businesses that may need one.

The Local Agency Angle

Perfect for subscribers interested in starting a simple website service for local businesses without becoming a coder or designer.

The Recurring Hosting Angle

Because hosting is included, users can potentially bundle website creation with ongoing hosting, content, or maintenance services.

The “No Blank Page” Angle

The Master Plan + Brand Kit gives users direction before they touch the editor — a much easier story for beginners.

The Digital Asset Angle

Users can build niche, affiliate, or client websites as assets they can grow, monetize, or sell.

The One-Dashboard Angle

Planning, branding, building, content workflows, lead discovery, audits, and pitches all live in one connected system.
