

Kuna SD Strategic Plan Implementation

Focus on the District's Value ~ Doing the *Right Work*

Pillar: Safe Schools

Focus on Stakeholders' Value ~ Doing the Work *Right*
Lead: Kim & Tracy

Vision: Our schools will be safe. Each school will foster a culture which supports the whole child and celebrates our students' diversity and sense of belonging in a safe and secure environment.

Identify	1	Identify Your Stakeholders (Customers)	2	Identify Your Stakeholders' Value
	Based on the pillar's vision, are they students, employees, families, the community, or others? Enter your stakeholders here: Parents, students, staff, community		Based on the pillar's vision, what are their needs, wants, benefits/ interests? All of this is value. I.e: what do they want, what will make them happy? Enter your stakeholder's interests here: <ul style="list-style-type: none">• Supporting the development of the whole child• Community supports and resources• Safe and secure environment	
Initiate	3	Initiate Outcomes (SMART goals)	4	Select and Finalize Your Goals Carefully

Supporting the development of the whole child

1. Research and identify a curriculum to implement in K-12
2. Provide professional development
3. Design an aligned social work/counseling program K-12

Students are competent and confident in all the skills needed to be successful in school, careers, and life.

Students are able to spend more time learning in their classrooms and Curriculumteachers are able to spend more time supporting and celebrating student growth.

Students learn how to self-manage, resulting in student growth and retention in school.

Community Supports and Resources

1. Community Champions work with their organizations to develop a plan to support students and staff
2. Continue community "coming together" workshops
3. Explore each school adopting a community service project

Safe and secure environment

1. Review and update safety protocols
2. Safety plans are practiced as required
3. Safety trainings

Students are competent and confident in all the skills needed to be successful in school, careers, and life.

Students are able to spend more time learning in their classrooms and Curriculumteachers are able to spend more time supporting and celebrating student growth.

Students learn how to self-manage, resulting in student growth and retention in school.

The community is informed about what we're doing and why and is engaged in supporting these efforts in our schools (e.g. community schools, career internships), at home and in community setting.

Students and staff will help create a safe and secure culture at all school functions.

Execute

5 Create Projects

Based on goals from step 4, what would be the process/steps towards the implementation and action to realize the goal? Mostly, it will be a unique or temporary action. Give each project a name.

Monitor

6 Use the project management tool (spreadsheet) to track your projects

If each project has its own project management tool, link them here so you can easily find them

[Project A](#) (Connecting Together)

[Project B](#) (Safe Campus)

[Project C](#)

Validate

7 Validate and report the results

When all the projects are completed, write a summary on how the results from several projects impacted the stakeholders' benefits. How did you address step 3?
