

Create 50 Blogger Accounts Safely

In the increasingly competitive world of Online Marketing and MMO, managing multiple accounts has become a critical success factor. However, major platforms like Blogger are deploying increasingly sophisticated fraud detection systems, causing many marketers to lose their accounts overnight.

The problem isn't what you're doing - it's how platforms identify WHO YOU ARE through your digital fingerprint. Every time you log in from the same browser, they're tracking hundreds of parameters: Canvas fingerprint, WebGL, Timezone, Font list, Screen resolution, and much more.

Platform Detection Methods

To understand why you need antideetect browser, see how Blogger tracks you:

****Layer 1: Network Fingerprinting****

IP Address and Geolocation

DNS leak detection

WebRTC public IP exposure

Connection speed and latency patterns

****Layer 2: Browser Fingerprinting****

Canvas fingerprinting (99.9% unique)

WebGL vendor and renderer

AudioContext fingerprinting

Font enumeration (50+ fonts)

Screen resolution and color depth

Timezone and language settings

****Layer 3: Behavioral Biometrics****

Mouse movement patterns

Typing speed and rhythm

Scrolling behavior

Click patterns and timing

Session duration patterns

For Blogger, matching 70%+ fingerprint is enough to link accounts. Antidetect browser is the only solution to isolate 100% of these factors.

Multilogin Cloud Phone: Next-Level Protection

Beyond antidetect browser, Multilogin also provides ****Cloud Phone**** solution - virtual mobile devices for situations requiring mobile fingerprints.

Use Cases For Blogger:

****1. Mobile-First Platforms****

Some platforms like TikTok, Instagram prefer mobile traffic:

Cloud Phone provides real mobile fingerprints

iOS and Android emulation

Native app behavior simulation

Mobile IP addresses

****2. SMS Verification****

No need to buy hundreds of SIM cards:

Virtual phone numbers

Receive SMS online

Disposable numbers for testing

International numbers support

****3. App-Based Activities****

For tasks that cannot be done on web:

Native app features

In-app purchases

Push notifications

Location-based features

****4. Ultimate Security****

Combine browser plus cloud phone:

Web activities on Multilogin browser

Mobile activities on Cloud Phone

Cross-platform consistency

Maximum anonymity layer

Especially useful for MMO Marketing when running both desktop and mobile campaigns simultaneously.

Case Study: Affiliate Network With 200+ Accounts

Background: David runs affiliate network, manages accounts for team members.

Scale: 200+ {platform} accounts across 10 team members.

Previous Setup: Each team member managed own accounts, inconsistent, 30% ban rate.

New Setup With Multilogin:

Multilogin Scale plan (1000 profiles)

Centralized management dashboard

Standard SOPs for all team members

Profile sharing and collaboration

Impact:

Ban rate decreased from 30% to 2%

Team productivity increased 3x

Onboard new members in 1 day (vs. 2 weeks)

Monthly revenue: \$180K+ stable

Lesson: *At scale, consistency is everything. Multilogin allows standardizing processes across entire team.*

Final Words: The Choice of Winners

In MMO Marketing, there are 2 types of people:

Type 1: Those still struggling with 1-2 accounts, afraid of bans, don't dare to scale, stuck at \$500-1000/month forever.

Type 2: Those who invest in proper tools, run 50-100 accounts, scale easily, earn \$10K-50K+/month.

****The difference?**** Type 2 understands that business expenses are necessary. \$200-400/month for Multilogin plus proxies isn't a cost - it's an INVESTMENT in infrastructure.

Think About It:

A large agency willingly pays \$5,000-10,000/month for Multilogin Enterprise

Media buyers spend \$1,000+/month on tools

Serious marketers never cheap out on infrastructure

****If you're serious about Blogger and MMO Marketing****, the decision should be obvious.

Multilogin.com

****P.S.****: Within 30 days, you'll look back and realize this was one of the best decisions you made for your business. Or you'll still be stuck in the same place, complaining about bans and limits.

Choice is yours. Winners act fast.

Disclaimer: Multilogin is a legal tool designed for legitimate multi-account management, marketing agencies, web scraping, and automation. Users must comply with terms of service of platforms they use. Author is not responsible for misuse.
