INTRODUCTION

The introduction contains the research background in a concise, concise, and clear manner; research purposes; as well as supporting theories. Written in Times New Roman font, size 12, space 1. Writing in a foreign language is typed in italics. In narrative writing, no need to be given a special subtitle. Included in the writing of operational definitions, if deemed necessary, also written narratively. All forms of reference used must be written down the source. Writing citations or references using body notes, namely by writing the last name of the author and the year of writing written in brackets (Muthmainnah, 2017). (*Time New Romance, size 12, space 1*)

The problem formulation contains article questions that must be explained in the discussion and answered in the conclusion.

enter 1 x

METHOD

The research method contains the type of research, sample and population or research subjects, time and place of research, instruments, procedures, and research techniques, as

well as other matters relating to the method of research. This section can be divided into several sub-chapters, but no numbering is necessary.

enter 1 x

RESULTS AND DISCUSSION

This section contains data (in brief form), data analysis, and interpretation of the results. Results can be presented in tables or graphs to clarify the results verbally because sometimes the display of an illustration is more complete and informative than the display in narrative form.

This section must answer the problems or research hypotheses that have been formulated previously.

enter 1 x

CONCLUSION

The conclusion must be linked to the title and answer the research formulation or objectives. Do not make statements that are not adequately supported by your findings. Write down improvements made to industrial engineering or science in general. Don't create further discussion, repeat abstracts, or simply list research findings. Don't use bullet points, use paragraph sentences instead.

REFERENCE

Reference is a list of information cited in a text that is identified and taken by the author and is sourced from books and scientific articles. The information cited is from accurate and genuine sources. Consistency in references allows readers to focus on the original content of the article.

References must be presented in full and in accordance with the information cited in the contents of the article. The reference list must be arranged alphabetically (**A to Z**) and written last, with the concept of the **American Psychological Association (APA)** or by using the **Mendeley** application.
