

(Shorter version)

Subject: Considering Wayground for our school

Dear [Principal Name],

I hope this email finds you well. I wanted to propose considering the unlimited version of the Wayground Instructional Suite for our school. Several teachers, including myself, are already using it with great results. The unlimited version would provide school-wide accessibility features that prevent students with IEPs and 504s from feeling singled out by their accommodations, complete access to standards-aligned resources and reports, and LMS integration for grade syncing. Here is a link to learn more: <https://bit.ly/quizzizz-plan-details>

Thank you for your consideration, and please let me know if I can provide further information.

(Longer version)

Subject: Considering Wayground for our school

Dear [Principal Name],

I hope this email finds you well. [I'm not sure if you're aware of / I believe you're already familiar with] the Wayground Instructional Suite and that some teachers in our school are using it. I wanted to take a moment to invite you to consider exploring the unlimited version for our school.

Here are some results from my classroom with the Wayground Instructional Suite this year:

- % improvement in scores when my students reattempted practice assessments
- A significant increase in engagement in my classroom, especially [insert any student groups especially benefitting from Wayground]
- X hours saved per week due to auto-graded assignments and assessments

However, the X teachers currently using the Wayground Instructional Suite in [School Name] aren't able to utilize resources that I believe are well-suited to our students' needs:

- Unlimited access to their new standards-aligned resources and reports, as well as 20+ media and question types based on standardized tests
- School-wide accessibility features that make additional necessary accommodations available to students with special needs
- The ability to sync to our LMS to pass back grades

In case you are interested in exploring this further, here is a link to learn more:
