

Welcome To The Future!

You've been selected to try, (and potentially integrate) the first *General Digital Intelligence System*.

So, do you want to spend 90% less time on digital drudgery?

Accomplish: Communications, Social Media, Sales Management, Newsletters, Spreadsheets, schedule and other list generation, and all manner of digital detritus in as little as 10% of the original time, all while maintaining your full creative character.

Click here to autonomously checkout with the System Integration Agent

Terms of use: By opening the links in this document you agree to purchase the system (through the above link) by the end of the Alpha Phase trial if you intend to use it after the trial ends. With any subsequent unpaid usage of the system being in violation of our terms. The Alpha Phase trial which you are now a part of is 7 days long, if you checkout during the trial you will receive up to 90% off, click the 'System Integration Agent' link above to learn more about the Alpha Phase offer.

[AI Keys Description\(s\)](#)

INSTRUCTIONS: 1. Click the below link, then click the 'Activate Intra-Agent Key' button, then tell it what you want to work on (or, Apple users refer to the below 30-Sec Demo for a more efficient workflow using Apple Intelligence). Repeat that process on a work session or project basis and It will help you implement the right keys for the right tasks, to whatever scale is needed, up to infinity.

[click here](#) to engage with our first of its kind 'Intra-Agent' collaborator.

Apple OS 26 users: use [This Shortcut](#) to exponentially increase system efficiency and LOD.

New Users Watch This [30-Sec Demo Video](#) or

this [Demo Video](#) (short)

or this [Demo Video](#) (long)

NOTE: You have to manually copy each key (from the respective link below) and paste it into your chat with the Intra-Agent to activate it.

ALTERNATIVELY: For Apple users running OS 26 on any device, use this shortcut which will copy the selected key directly to your clipboard once you've completed running the shortcut (as

in you need to hit the checkmark in response to the second message from Apple Intelligence)

Rewrite that 'key-input message' when switching keys inside of a single chat.

Please note, your payment gets you a license for the keys within your organization with a maximum of 25 users. If you require more seats, there would need to be an individual invoice/payment per 25 user seats, so one invoice/payment represents 1-25 users, but regardless does not grant access to any other organizations. If anyone else wants their own license please forward this document to them.

Contact ai@nevilleproductions.com

(One final note, with the email key which is modular by nature, to make sure the system performs as accurately as possible, if inputting multiple messages from the same conversation next to the header "Text 1" "Text 2" type (same conversation)

So

"Text 1"

Message

Text 2 (same conversation)

Message

Welcome To The Future.
