

We Thinkers

Description: We Thinkers is by the same creators as Superflex. Through stories of familiar characters, discussion, and activities, students will develop skills required for social problem solving.

Purpose or goal of the program: Students will learn about the difference between thoughts and feelings and how to use their senses to determine hidden rules and expectations in social settings. Students will also learn how to use their senses to make smart guesses about situations. Through stories and activities students will learn to determine sizes of problems as well as having appropriate sized reactions to those problems.

Number of participants needed (max/min): This program is run in the classroom with all students.

Materials & space needed: Materials required include lesson plans, story books, and handouts.

Supervision needed: One program facilitator and the classroom teacher will be present.

Time commitment: Half an hour a week for ten weeks.

Cost: One time cost of We Thinkers curriculum materials.
