Frequently Asked Questions

What apps are available?

Our apps provide a variety of simple tools and utilities designed to help users complete specific tasks efficiently and accessibly.

Do I need an account to use the apps?

No. Our apps do not require users to create an account. You can use the available features without creating or providing personal account information.

How accurate are the results?

Results are generated using the methods, formulas, or data sources implemented within each app. Results may vary depending on the information entered and the functionality being used. Users should independently verify results when using an app for academic, research, financial, or professional purposes.

Do the apps collect my data?

No. Our apps do not collect, store, or sell users' personal information. Information entered into an app is used only to provide the requested functionality and is not collected for personal data purposes.

Can I use the apps for academic or research purposes?

Our apps are intended as supplemental tools for learning, coursework, and research. Users are responsible for completing their own work, following applicable academic and research policies, and independently reviewing and appropriately interpreting app-generated results. Users should not rely solely on app-generated results for academic, research, financial, medical, or professional decisions.
