

Hello Everyone, as you know we will be having a bioinformatics panel next tuesday 4/30 at 5:30 in GMCS 329. In this document, please write questions that you have for the speakers.

The speakers are:

Paul Fryling- Senior Software Engineer at Moderna Therapeutics and founder of our club

Jennifer Fouquier- PhD student in Computational Bioscience at University of Colorado

Daniel Cuevas- Bioinformatician at Progenity Inc.

Michelle Beoris- Software Engineer at Helix

Andrew Hatch- Bioinformatics scientist at Thermo Fisher

Jenny Waters- PhD student at SDSU

Write your questions here:

1. What research experience did you have to prepare you to get into this graduate school/job?
2. What has helped you to get to where you are and what advice would you have for others who want to set off in a similar direction? -Callie
3. What helped your decision for this career path and were all the struggles worth it? -Callie
4. We have many undergrads who haven't been formally introduced to bioinformatics yet. For the people who also studied Biology/Chemistry, what made you decide to pivot into bioinformatics
5. What did you do to set yourself apart from others that wanted the same job?
