

Defining Objectives:

- I am better suited to be a swing trader because I am able to ride out the trades without losing control of my emotions

Time Availability:

- I have only a 2-3 hours a day for trading since I am still in school
- This is why I will be doing swing trading however I will also focus some of my money and time into long term investing

Asset Class:

- I will be trading primarily growth stocks since I am a swing trader
- I will also trade Options

Risk Profile:

- I would put myself in the risk averse category because I still don't have much money however I can afford to lose the money since I am still young
