INTRODUCTION

The introduction of the study should consist of:

- The introduction should be clearly identifying the research problem, rationale of the study and context related issue in National and International
- Stated the gap of your study to show the significant of your study and reason why you need to conduct this study
- Explain the previous evidence related to your study in order to show the gap of literature with your study. You may also show the connection of variables with relevant theoretical and empirical evidence.
- Times new roman, 11-point pont

OBJECTIVE

- The objective should be stated clearly. Explain the main objective of your study
- Times new roman, 11-point point

METHODS

- The method section should describe the process of community service activities. Write down various types of tools and materials as well as implementation steps
- In the method section, it is also written the location and time of implementation as well as the sample that is the target of community service
- Include the pre and posttest in the activity and the instruments used (if any)

- Times new romance, 11-point

RESULTS

- The researchers were suggested to describe the characteristic of samples including age, gender, etc.
- In the results, the researchers should state the results follow the objective of the study. It also should be explained in concise
- Include documentation of activities
- The figure and table may show but not more than five table/figure

DISCUSSION

The discussion part was important part of the study. It may consist of:

- Explain the findings of your study
- Draw the new knowledge from your findings could contribute for the theoretical development or previous findings.
- Stated the strength and limitation of your study (if any) and provides the implication for clinical practice and further researcher.

Acknowledgement

This section can be expressed thanks to institutions, experts, or other bodies that play an important role in the implementation of research undertaken

REFERENCES

All authors must use the software for manage the reference such as Mendeley or EndNote or etc. The references style of this article should be APA style. For example:
