[Season of Trees – Lesson – Willow Bend - \\$](#)

Explore the life cycle of Flagstaff trees through a story, song, and guided imagery.

[Community Helpers - Lesson - Fire Ecology Learning Lab at NAU - Free](#)

Students learn about wildland firefighters and other land management careers. Students explore different biotic communities and how they can help care for the land. Downloadable materials are available.

[Fire Ecology Learning Lab at NAU – K- 2nd grade – Free downloadable lessons and Activity Kits](#)

The Fire Ecology Learning Lab was designed to help Arizona and New Mexico students explore the complexities of fire ecology in their region. We have expanded the initial middle school lessons to include activities for kindergarten through high school students. All the materials for class visits and hands-on activities are included in our kits housed at partnering organizations across the Southwest. These kits are free to use and are designed for informal educators or agency staff members who visit classrooms as guest speakers or engage with students frequently. Fill out this [form](#) to reserve a kit.

[Kindergarten to 2nd Grade: Community Helpers](#)

Students learn about wildfire and other land management careers. Students explore different biotic communities and how they can help care for the land.
