Steps to Adding a Title Slide

Full Transcripts

Steps to adding a title slide. Start by ensuring that you are in the edit page. Select the effects tab. Within toolbox, select titles. Within titles, select basic titles. Click and drag the title you selected to the timeline, placing between the bumper and your raw video. Once the title is on your timeline, you'll want to adjust its duration by dragging the end. To customize your title, select the title box, look on the right side of the screen for the inspector panel. In the text box, click to edit the title text, customize it with your course prefix and description such as LDT 502. To format your title, within the inspector panel, you can adjust various settings including the text font, the text color, the text size, bold or italics, line spacing and tracking, as well as background color. Make sure learners can read the title slides based on the text size and font and that the color contrast follows accessibility guidelines.
