

School Wide Lessons

Expectations

THE PHILOSOPHY OF SCHOOL WIDE LESSONS

Out of a need to deliver district and site information to students and teachers each week, holding a school wide session has been integrated into the HST. This frequent 30 minute session allows the school to deliver much needed information without impacting classroom instruction.

SOME BASIC UNDERSTANDING OF HOW SCHOOL WIDE LESSONS WORK:

- School Wide Lessons will take place on (Monday's) and are designed for teachers to assist students in scheduling HSTs for the week by utilizing grades in Aeries and assignments in Google Classroom.
- School Wide Lessons will have lessons that focus on character development, academic mindfulness, digital citizenship, information on upcoming events, and development of college and career readiness skills, and personal development.
- School Wide Lessons will allow for the school bulletin (Baler Media) to be shown to update all things going on weekly at SBHS.
- School Wide Lessons will allow for ASB to handle their housekeeping needs; voting, student congress representatives, student congress feedback/etc.
- School Wide Lessons for most students will be with one of the teachers they have for the school year. This can help to build better relationships, trust, and additional support from them if needed.

- In School Wide Lessons staff will take attendance in Aeries and SBHS will communicate absences to families as they do with all other classes.
- During School Wide Lessons (Monday's) teachers will assist students in scheduling HSTs for the week and encourage and guide them on how to choose based on need.
- HST offerings for each department may change weekly depending on the identified needs of students.
