

NZ HEALTH EDUCATION ASSOCIATION

2024 Practice exam for Level 3 Health: AS 91462

Analyse an international health issue: The impact of poverty on access to sexual and reproductive health services.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
Analyse an international health issue.	Analyse, in depth, an international health issue.	Analyse, perceptively, an international health issue.

Teacher preparation required before using this resource – please delete this information before using the examination with students

This practice exam has been written to the assessment specifications for the 2024 Health 3.2 (AS 90972) externally assessed Achievement Standard: *Analyse an international health issue*.

Create your own cover page for this practice exam, which might include your school logo, the achievement criteria for this standard and space for the student's name.

For guidance in preparing students for this external examination, refer to the information available from <http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/subjects/health/levels/>

Note that two versions of this examination are available: (1) a print resource with lines for students to handwrite their answers; (2) a 'digital' version with 'cells' to type into and a recommended word count to guide the expected length of answer that would otherwise be indicated by lines to write on.

Every effort has been made by NZHEA to ensure this examination is 'fit for purpose' in providing a practice opportunity for the external examination, including an assessment schedule for teacher use.

Please note that these practice exams have no official status and teachers are welcome to write their own 'mock' or practice exams or modify aspects of this exam to make use of other resource material.

INSTRUCTIONS

A health issue of international concern is **the impact of poverty on access to sexual and reproductive health services**. This is of concern to public health as it is affecting the well-being of a significant number of people.

Before you begin, read ALL parts of the question. Support your answers with **specific and relevant evidence** from the **Resource Booklet**, and your own knowledge about poverty. Evidence can include examples, quotations, and/or data from credible and current sources.

*The suggested WORD COUNT is **only** a guide. It is intended to give you an idea about how much to write so that is equivalent to a printed exam paper where answers are handwritten.*

PLANNING

Consider:

- Significant and relevant determinants of health
- How each determinant contributes to implications for well-being
- Strategies for more equitable outcomes
- Connections to the underlying concepts of health.

QUESTION

- (a) Explain how access to sexual and reproductive health services related to poverty is a health issue of international concern.

130 words

- (b) (i) Identify TWO significant determinants to health (DOH) that contribute to the health issue of access to sexual and reproductive health services related to poverty.

Note: Refer to these two significant determinants of health when answering all remaining question parts in this booklet.

DOH (1):

DOH (2):

- (b) (ii) Explain how the two determinants of health could impact the short-term and long-term well-being of an **individual**.

280 words

- (b) (iii) Explain how the two determinants of health could impact the short-term and long-term well-being of a **particular group or community**.

280 words

- (c) (i) Identify ONE societal strategy that could positively address the impact of poverty on access to sexual and reproductive health services.

Societal strategy:

- (c) (ii) Using the determinants and impacts from (b), explain how this strategy could enhance the well-being of **individuals** affected by access to sexual and reproductive health services related to poverty.

220 words

- (d) (i) Identify ONE community strategy that could positively address the impact of poverty on access to sexual and reproductive health services.

Community strategy:

- (d) (ii) Using the determinants and impacts from (b), explain how this strategy could enhance the well-being of **communities** affected by access to sexual and reproductive health services related to poverty.
