Data Analysis Assessments (4 % of class grade)

The instructor in this class is participating in a CUNY-wide initiative, supported by the National Science Foundation, to infuse data analysis across the curriculum. As part of this initiative, faculty in courses across CUNY are administering assessments in their classes. These assessments are designed to measure students' attitudes and skills relating to data analysis and quantitative reasoning. There will be an assessment administered very early in the semester and one at the end of the semester. **These assessments count for 4% of your class grade (each assessment is 2%), but you are NOT graded on your performance.** That said, we do ask that you try your best since student performance on these assessments speaks to the skills and talents of CUNY students. Before you take the assessment, you have the option of indicating whether or not you want your assessment data to be used for research purposes. If you opt to allow the data to be used for research purposes, you will be compensated \$5 for each assessment you complete. Additional information about the assessments will be provided in Blackboard.
