

Jules Goldberg

Founder

Jules Goldberg is the founder of Sleepwave. He has created other top-rated sleep apps that are part of the [Reviva Softworks](#) portfolio, including the acclaimed SnoreLab.

With a passion for engineering, Jules pioneered snoring detection in apps and subsequently invented the patented motion-sensing technology that powers Sleepwave.

He is a self-taught developer who is passionate about creating apps that have a positive impact and solve real-world problems. Jules created his first app SnoreLab in 2012, armed with only a laptop and a head full of ideas. The app has since had over 14 million downloads and has helped countless people around the world with their sleep and snoring issues.

Since its launch in 2022, Sleepwave has been downloaded over 1 million times and its patented motion-sensing technology has been featured in a range of [leading tech publications](#).

The company is fully bootstrapped with no external investors.

Jules studied at the University of Cambridge. He lives in London with his wife and two children.
