

Before and After Fire Predictions:

Part 1: Create Two Illustrations

- Focus Questions: What does a grassland or rangeland look like before and after a fire? What role does fire play in this type of ecosystem?
- Please answer the questions above by creating two drawings in the space provided below. Add as many of the following labels as possible: Grasses, trees, animals, wildlife habitat, new growth, burned area, unburned area, producers, consumers, herbivores, carnivores
- Once you have created your drawing, please complete the self-assessment by circling the level of detailed you added:
 - A. I have added details that go above and beyond explaining what I think these two examples look like.
 - B. I have added sufficient details that explain what I think these two examples look like.
 - C. I have attempted to add details that explain what I think these two examples look like..

Before a Grassland Fire	After a Grassland Fire

Part 2: Short Answer

Reflect on your drawings above and decide if you would support the following statement. Explain your position in complete sentences: Fire is always harmful to a grassland ecosystem. You may use the following sentence starter: “ _____ (Yes or No), _____ (I agree or I do not agree) with this statement because _____”

Before and After Fire **End of Unit Drawings:**

Part 1: Create Two Illustrations

- Focus Questions: What does a grassland or rangeland look like before and after a fire? What role does fire play in this type of ecosystem?
- Please answer the questions above by reflecting on what you have learned and by *reading the story on the back of this page*. Then create two drawings in the space provided below. Add as many of the following labels as possible: Grasses, trees, animals, wildlife habitat, new growth, burned area, unburned area, producers, consumers, herbivores, carnivores
- Once you have created your drawing, please complete the self-assessment by circling the level of detailed you added:
 - A. I have added details that go above and beyond explaining what I think these two examples look like.
 - B. I have added sufficient details that explain what I think these two examples look like.
 - C. I have attempted to add details that explain what I think these two examples look like..

Before a Grassland Fire	After a Grassland Fire

Part 2: Short Answer

Reflect on your drawings above and decide if you would support the following statement. Explain your position in complete sentences: Fire is always harmful to a grassland ecosystem. You may use the following sentence starter: “ _____ (Yes or No), _____ (I agree or I do not agree) with this statement because _____”
