Vtuber: Cerberos // Rigger: Sinuuki (contact @Sinuuki for any live2d specifics)

Character type: *"Sweet but a Psycho"*, non-lewd tentacle monster "girl", *performative* cuteness to hide monstrous/manipulative personality, self aware about being an "influencer", *gender neutral body*
"Mood": https://www.youtube.com/watch?v=7xKdRezA0vQ

Streamer type: I am primarily a chatting/asmr/charity streamer. My primary job is voice acting. I have a lot of horizontal space because I don't stream games often, so I'd like the design to prioritize half-body view instead of bust-up view

General concept: Pastel Goth x Cybergrunge Tentacle Girl

Color palette: Yellow, Pink, Blue, Black, *LOUD colors*

Character design inspiration: [Delta / Tempo from Honkai]

Character personality: [Junko from Danganronpa]

Vtuber Inspiration: Hunikinn

Clothing:

- Yellow Techwear windbreaker with grunge/punk underneath
- Non-lewd design, emphasis on clothing silhouette and not body silhouette
- Top would be simple like a black band tshirt (to not make the top half look too busy), but the pants would be mixed goth/grunge patterns (flannel, checkered, fishnets, etc)
- If the clothing could somehow be tied to the monster elements, that would be cool. (See “other notes” at bottom.

Clothing Accessories: Mall Goth with a little bit of harajuku
- Studs, spikes, chains, pins, hot topic
(Note: these are just examples for inspo, no need to include everything)

Makeup: Over the top, Harajuku & “sick-cute” influence

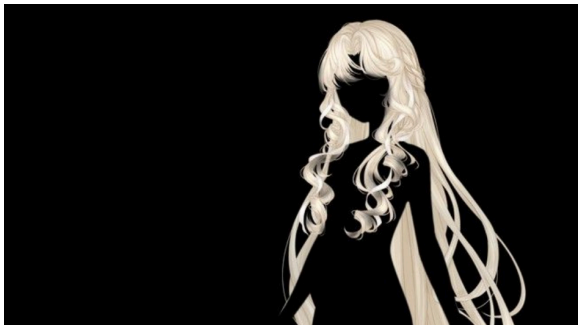

Hair: Pink Tentacles with two short pieces making “cat ears”. The hairstyle is the one I am most unsure of, because I don’t know what would look best.

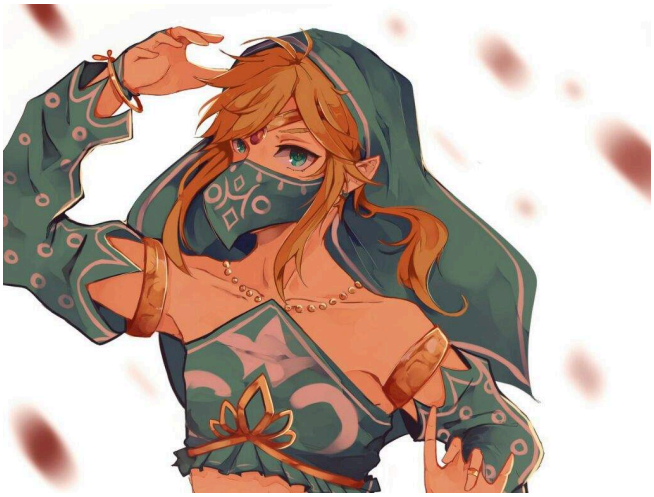

Character body type: Androgynous, flat chest, short so it fits half body view in 16:9

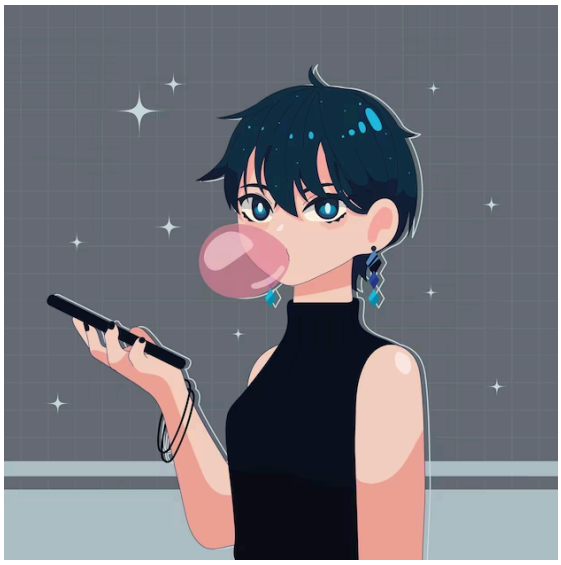

Clothing Silhouette: I really like the way a giant jacket looks on a small body frame, like Rebecca from Cyberpunk or Tamaki from Fire Force. I just don't want it to be oversexualized. Sleeves should not cover fingers. Clothing layers underneath should be conservative and not expose much.

Default pose: Standing up, facing forward, one hand loosely holding a phone (but not really looking at it)

Eyes: Pretty face but with **psycho heart eyes w/ a spiral** **(not “I love you” eyes, but “don’t you dare leave my stream” eyes)**

Mouth: Tentacle for a tongue

My other Vtuber models:
Dog Incubus // Cat Boy

Other notes: Sinuuki wanted to rig some kind of “dark mode” / lighting effects on the model, so it would be cool to incorporate something like that in the design for the model art. I also like how the tentacle arms look kind of like jacket sleeves, so if you could somehow do something like that with the clothing, I think it would be super cool! I am not afraid of the model looking “too monstrous.” I am an NSFW and Horror writer/voice actor, so I can pull it off as a cute model or a horror model.
