ABSTRACT

An abstract is a single paragraph, without indentation. It must cover five components: (1) brief background; (2) research purposes or research questions; (3) methods; (4) results; and (5) [illegible]. This certainly changes to some extent the management of integrated centers and centers in providing services to PPKS. One thing that is important is the readiness of human resources for each Integrated Center or Center to implement multi-service programs in the field of social rehabilitation.

Key words: ATENSI, professionalism, social workers, human resources
