**Lots of Flubbed Headlines:
And Other Assorted Bipolar Amphibolic Chortles**

collected by Robert J. Marks

In each of the flubbed headlines in the list below, there is a serious and a funny interpretation. The authors of the headlines mean to communicate the serious meaning. The funny meaning is a play on words not noticed by the headline writer. For each headline, without any additional context, an average person can use common sense to quickly identify the serious and funny interpretations. Artificial intelligence at the time of the book's writing, AI did not have the ability to resolve this ambiguity. Large language models have changed this by allowing interpretation of context. These flubbed headlines can now be resolved by AI.
