

King's Landing District 16b

By Finn and 7

District Description:

District 16b is a very small, but rather wealthy district, located to the east of the Hill of Rhaenys and nestled beneath the Eastern Wall of the city. To the north is the Dragon's Gate and to the south is the Iron Gate. Shae's Manse can be found just south-west of the district. There is no important canon concerning the district, but in our server it plays host to many glass blowers, window makers, and the glass blower's guild.

New Canon:

We found no canon for the district since there is nothing canon worthy in it. (If someone still finds something, please let us know!)

District's Current State:

The district is actually pretty well-plotted. However, the overall gradients are quite dated and lack cohesion with the new style established for this region of the city by /warp k18. Moreover, many of the interiors are very cramped and over-busy. What is more, the glassblower's yard is very underdeveloped in our opinion.

Updated Plans:

The district's plotting will be tweaked every so slightly just to create more continuity of style, and more interesting shapes with some more diagonal buildings. Furthermore, two of the glassblowers in the district will be repurposed into new professions to help reduce the dominance and overbearing presence of the occupation (one will now be a

barbers, the other a bakers). The rest of the professions will remain as they were. All builds will be updated to our style tests.

Current Map:

Updated map with plotting (red indicated where the plotting has been updated from the original structure, white is the original plotting):

House Tests:

All tests can be found at /warp finn with class, professions, and gradients indicated above each plot.

Thanks for reading!
