

HOME REMEDY DETOX SOLUTION

Make your own [Prime Ph Elixir](#)

Prime Ph Elixir

Sodium chlorite (Na^+) is used to create chlorine dioxide (ClO_2). Na^+ is a salt derivative and a powerful oxidant. It's a natural medicine that absorbs toxic acids from your body and eliminates them. It is activated by your stomach acids so there's no need to use an activator. This is a superior method for detox.

Intructions: To make your own Prime Ph formula, use 95% of either spring water or distilled water only. Never use distilled water from a plastic bottle. Add 5% Na^+ (*sodium chlorite*) to 95% water. This is your Prime Ph formula.

Adults use 10-15 drops of the Prime Ph formula per quart/liter of water. Use only spring water or distilled water (*not bottled in plastic*). This creates your [Prime Ph Elixir](#). Drink 1-2 liters daily, every hour for 2-4 hours for general detox. Do not consume any antioxidants or supplements for one hour before using Prime Ph Elixir and one hour after you stop using Prime Ph Elixir.

If you don't want to make your own Prime Ph Elixir yourself, then you can purchase an already mixed formula through www.PhMiracleProducts.com.

Order **Prime Ph** here:

https://phmiracleproducts.com/products/innerlight-prime-ph?_pos=1&_sid=f958aabc0&_ss=r

Read Dr. Young's book on Na^+ (*sodium chlorite*) and ClO_2 (*chlorine dioxide*), here:

<https://phmiracleproducts.com/products/chlorine-dioxide-clo2-booklet>

Note: I personally do not recommend using MMS. If you are severely poisoned from a pharmaceutical inoculation then any amount of added toxicity could be very dangerous. If you are severely injured from the PCR or other jabs, you must start with very little CDS, like 1 or 2 drops.

Otherwise, you can use Dr. Robert Young's Prime Ph protocol with only the sodium chlorite and not the activator. This is the safest method for severe jab injury. Dr. Young explains that **Na^+ water** activates in your stomach acids and there it absorbs and detoxes bad acids from the body, thus electrifying your cells.

Function: Sodium chlorite (Na^+) is a salt derivative. It is a powerful oxidant which is activated by our stomach acids. It

absorbs the bad acids and toxins and expels them from your body. Prime Ph is critical to your detox.
