

Netplay Guide For Smash 64 (By: E2xD)

Resources Needed:

- 35 MB of space.
- Project 64kVE: (I provided 3 different links just in case one breaks)
 - http://www.mediafire.com/download/faah991a0w0l34k/Project64kVE_AL.zip
 - https://www.dropbox.com/s/7tovgo7s67mvt2s/Project64kVE_AL.zip
 - https://mega.co.nz/#!PB9h1SqS!B0AkLO_Dbqig-ArOF_QhHldW50BZ7WOI9mM2ZzHU5o
- Rom of Smash 64 (We can't link it.).

For Mac Users:

You will also need these additional 2 Programs.

- *The Unarchiver*: It's free on the App Store. Download this first as it lets you extract RAR and ZIP files
- *Winebottler*: download the correct version depending on what OS you have. Yosemite users will need the development version but everyone else should probably use the stable build.
 - <http://winebottler.kronenberg.org/>

Setting Up:

For Windows:

Extract Project 64kVE and place it anywhere. Place the rom in the Project 64kVE>Roms.

<http://prntscr.com/5q6sfk>.

Make sure you chose the correct ROM directory in File>Choose ROM directory:

<http://prntscr.com/5skesr>

For Mac:

Open up the Wine .dmg file you get once you download winebottler. Drag both the wine and winebottler icons into the applications folder.: <http://imgur.com/XbXgubH>

Extract Project 64kVE and place it anywhere. Place the rom in the Project 64kVE>Roms.

<http://prntscr.com/5q6sfk>

To start Project 64 right click on the .exe file and click open with Wine: <http://imgur.com/p0lvaOm>

When you first run Project 64 it's going to ask you if you want to make a bundle or not. Select the option to **NOT** make a bundle and check "Do Not Ask Again"

Make sure you chose the correct ROM directory in File>Choose ROM directory:

<http://prntscr.com/5skesr>

To find the right folder click on the "/" Directory in the screen shot, then go to users>your username> then wherever you extracted the project64 folder>Roms:

<http://i.imgur.com/N6P098R.png>

For All:

Launch Project64kVE.exe. (You may receive an Error, don't worry about it, just continue. It will be fixed). Go to Options > Settings.

Recommended plugins: <http://prntscr.com/5r2o6w>

- Jabo's Direct3D8 1.6,
- Azimer's Audio v0.30, Jabo's Direct Sound 1.6
- N-Rage's Direct-Input8 V2 1.83

Make sure you have all the proper plugins selected and click OK.

Go to Options > Configure Controller Plugin. Set up your controller or keyboard however you like. Then go to the "Controller Pak" tab and uncheck "RawData". Click Save.

My Presets: <http://prntscr.com/5r2tti>

Included are two Presets on how I set up the GC Controller (One for L or R Shielding). In Options> Configure Controller Plugin, hit Load Profile and you should see to presets (make sure you change input device so it will recognize your device):

<http://prntscr.com/5r2tll>

To Netplay (Server):

Go to File>Start Netplay

Make sure you: <http://prntscr.com/5r2d67>

- Enter Your Username
- Connection Type is set to LAN
- Change Mode Set to 2-Client
- Add a New Server:
 - Name: Smash FU [New York]
 - IP: 104.131.44.48:27888
 - Name: Smash FU [Chicago]
 - IP: 199.16.13.11:27888

Go to the newly created Server and join: <http://prntscr.com/5r2ff3>

For the Host:

- Hit the Create Game Button: <http://prntscr.com/5r2dr4>
- Select Super Smash Bros (U): <http://prntscr.com/5r2dz9>

- If doing 1v1, I recommend changing your options to 2 players: <http://prntscr.com/5r2e51>
- Also, Select True for Same Delay: <http://prntscr.com/5ruvgx>
- From here, you can kick people out who randomly join your game, and control who enters your room.

For Joining:

- Find your host in the bottom section: <http://prntscr.com/5r2en3>
- Double click to join room

To Start:

- Host:
 - Start Game: <http://prntscr.com/5r2f0z>
 - Click Option and Gameshark Codes: <http://prntscr.com/5r2ggj>
 - Select Unlock Everything: <http://prntscr.com/5r2l9w>
 - Change Rules to Stock: <http://prntscr.com/5r2gnx>
 - Make Sure Items are Off: <http://prntscr.com/5r2gpm>

And... ENJOY!

Happy Smashing and Shield Breaks!
