

Project description:

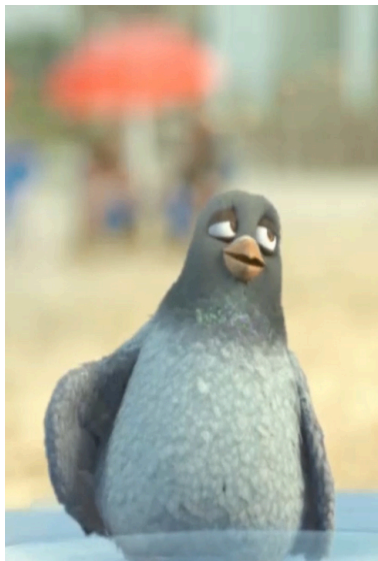

Create a series of digital shorts for release on Tiktok and Youtube to promote our new production company and video capture technology ([Bob Interactive](#)).

Series idea:*Bird flu report*

60–90 sec digital shorts featuring a bird covering bird flu news (pigeon, hawk, whatever).

A writer will create the character's personality, appearance, and scripts, including choosing articles about bird flu from [r/H5N1_AvianFlu](#) or similar. Content should be optimized for TikTok (e.g., follow the 3-second rule). Familiarity with public health information, healthcare news and H5N1 required. A voice actor will work with the writer and our team to develop a unique voice that complements the character's personality and enhances audience engagement.

Format: clip show (news article superimposed with image of host talking)

**Production team:**

- Character development and script writer (currently hiring)
- Voice actor (currently hiring)
- Motion capture and video production (done by bob)
- Release and promotion (done by bob)

Timeline and cadence:

3-5x 60-90 sec short per week.

Workflow:

[Bob Discord](#) for team communications. Project lead; Mark Drew. mark@rainn.ai

How to apply:

Find application in **#*hiring-for*** channel in [Bob Discord](#).
