

Rapid Transit System

The RTS is an ultra-fast underground train that connects all RS locations in P-4, the current stations are:

- Massive building in the middle of the desert with nothing around - (RS Head Quarters)
- Rapid's home inside Unihorn Mountain - (New Unihorn Laboratory)
- Small office inside the mountain range with an exit to Canterlot - (Canterlot Evac Point)
- Small office on a street corner in Manehattan - (Manehatten Evac Point)
- Underground testing facility near Mount Aris - (Mount Aris Testing Site)
- Big lab on the sea floor - (Deep Sea Laboratory)

The RTS train car can only be controlled by a unicorn and can hold 30 ponies and cargo at a top speed of 300 km/h (slowing for turns and stopping for lifts and stations)
