Betting on Matchup - Okay fantasy football rule/game - Each week, we take matchup - deem it the "Game of the Week." We allow anyone to bet in \$10 increments on who they think will win the matchup. If your pick wins, you get that number of entries into a season-end raffle. If you lose, you pay that amount into the pot. We include the "fines" and at the end of the season, we draw winners from the pool of names, and the pot gets split. Its a spinoff of Scos idea where games mean something but with focus on league gambling ahahaha
