

Title: Zippered Waterproof Mattress Cover | Buy Online in Pakistan

Meta Description: Seal your mattress with a cotton-blend waterproof-membrane cover secured by a zipper. Get 2-side or 6-side coverage, sizes Single to King, with nationwide COD.

H1: Zippered Waterproof Mattress Cover

A zippered waterproof mattress cover wraps the mattress in a cotton-blend fabric bonded to a waterproof membrane backing, sealing it against liquid on every panel it covers. **This cover gives 100% liquid barrier protection while keeping the sleeping surface breathable**, so the mattress stays dry without trapping heat.

H2: What Makes This Zippered Cover Different?

This cover uses a cotton blend surface bonded to a waterproof membrane, closed with a zipper for a secure fit. Two zipper styles are available: a 2-side protector that seals the top and sides, and a 6-side full encasement that wraps the mattress completely.

Most fitted covers shift out of place during the night. A zippered design solves this by locking the fabric around the mattress edge, so it holds its position through 3 common causes of slippage: rolling over, pulling the top sheet, and repositioning pillows.

H3: Fabric That Breathes Through the Night

The top layer uses a soft cotton-blend weave that lets air pass through even with the waterproof backing sealed underneath. This avoids the crinkling sound and trapped heat common in plain vinyl sheeting.

- Cotton-blend surface, not a fully sealed plastic sheet
- Waterproof membrane bonded underneath, not laminated loosely on top
- Machine washable on a cold cycle without special detergents
- Soft enough for direct use without a top sheet

H3: A Zipper Built for Repeated Use

The zipper closure runs along the cover's edge and holds the fabric snug against the mattress on every side it seals. This matters for households that strip and wash bedding weekly, since a loose-fitting cover wears out faster at the seams.

H2: Key Features

- **Seals** the mattress on 2 sides (top and sides) or all 6 sides, depending on the style chosen
- **Blocks** liquid completely through a waterproof membrane bonded to the fabric
- **Resists** dust mites and allergens through a sealed backing layer
- **Fits** mattress depths from 10 to 12 inches across all three sizes

- **Washes** clean on a cold machine cycle without dry cleaning
- **Ships** nationwide with cash on delivery, so the product can be inspected before payment

H2: Sizes Available

Choose a size based on the mattress length, width, and depth before ordering. **3 sizes are available: Single, Queen, and King**, each fitting a mattress depth of up to 10 to 12 inches.

Size	Dimensions	Depth Capacity
Single	42" × 78"	Up to 10–12 inches
Queen	60" × 78"	Up to 10–12 inches
King	72" × 78"	Up to 10–12 inches

A Double size is not currently offered; contact the store directly for a custom size request.

What to Look for in the Fine Print

Before buying any waterproof cover, three label details separate a genuine barrier product from a marketing claim:

- **PVC / phthalate-free:** Vinyl-based membranes can involve phthalate plasticizers. A TPU or PU-backed cover marketed as PVC-free avoids this concern entirely.
- **OEKO-TEX or equivalent certification:** Independent textile certifications test finished fabric for harmful substances above safe thresholds — a useful check for covers used directly against skin.
- **Stated membrane type:** If a listing doesn't name TPU, PU, or vinyl specifically, assume the cheaper vinyl option and expect the trade-offs (heat, noise) that come with it.

H2: Why Choose Us

H3: Direct Manufacturer Pricing

Cutting out the reseller markup keeps the 2-side protector priced from Rs. 2,350 and the 6-side encasement from Rs. 3,150, both tied to the fabric and coverage style rather than a showroom margin.

H3: Pay-on-Inspection Delivery

Cash on delivery to Lahore, Karachi, Rawalpindi, Islamabad, and Faisalabad means the cover can be checked for stitching quality and fabric feel before any payment changes hands.

H3: Free Shipping on Full Coverage Orders

Orders above Rs. 3,000 ship free, a threshold that covers most 6-side encasement orders on their own and many 2-side orders in Queen or King sizes.

H3: Two Coverage Styles Under One Roof

Both the 2-side protector and the 6-side encasement come from the same cotton-blend, waterproof-membrane fabric, so switching between coverage styles does not mean switching fabric quality or care instructions.

H2: Who Needs a Zippered Waterproof Mattress Cover?

4 groups benefit most from a zippered waterproof mattress cover: parents of young children, allergy sufferers, renters, and pet owners.

- **Parents of young children** stop potty-training accidents from reaching the mattress core.
- **Allergy sufferers** block dust mites and pet dander from settling into the mattress fibers. A [controlled study published on PubMed](#) found that sealed mattress encasings reduced household dust and mite allergen levels significantly more than uncovered mattresses.
- **Renters** protect a security deposit if a landlord inspects the mattress at move-out.
- **Pet owners** block pet accidents and dander from reaching the mattress core, cutting nighttime allergy triggers.

H2: Zippered Mattress Cover Price

Price varies by size, color, and coverage style. Confirm the exact price for the chosen size and color at checkout.

2-Side Waterproof Zipper Mattress Protector: Rs. 2,350 – Rs. 3,150 per piece

6-Side Waterproof Zipper Mattress Protector (Full Encasement): Rs. 3,150 – Rs. 3,550 per piece

H2: Benefits of Using a Zippered Cover

A zippered waterproof mattress cover gives 6 measurable benefits over an uncovered mattress:

- **Protection:** Blocks spills, urine, and sweat from soaking into the mattress foam on contact.
- **Hygiene:** Stops dust mites and pet dander from nesting inside the mattress fibers.
- **Durability:** Adds 2 to 3 years to the average mattress lifespan by preventing stains and wear.

- **Security:** Blocks bed bug entry when used as a full 6-side encasement.
- **Savings:** Replaces a mattress worth Rs. 80,000 with a cover priced from Rs. 2,350, a saving of up to 97%.
- **Warranty:** Keeps the mattress surface free of damage, so manufacturer warranty claims stay valid.

H2: Washing and Care Instructions

Wash a zippered waterproof mattress cover on a cold or warm gentle cycle to protect the membrane. Follow these 4 steps for the longest wash-cycle life:

1. **Unzip fully** before washing, and wash it separately from rough fabrics or zippers that can wear down the membrane.
2. **Use a mild, bleach-free detergent**, skipping fabric softener, since it coats the membrane and lowers breathability.
3. **Keep the cycle cold or warm, never hot**, since heat above 60°C softens the waterproof layer.
4. **Air-dry flat, or tumble-dry on low heat**, skipping high-heat drying entirely.

H2: 2-Side or 6-Side: Which Zipper Cover Should You Pick?

Pick the 2-side protector for everyday spill protection, and the 6-side encasement for allergy control or bed bug prevention.

A 2-side zipper protector seals the top and sides, so liquid cannot reach the mattress from above or from a spill that runs down the edge. It suits bedrooms where the main risk is a drink, a child's accident, or everyday sweat.

A 6-side zipper encasement adds a sealed base panel, closing off the last gap a mattress has. This matters if the goal is blocking bed bugs or trapping allergens already inside an older mattress, since a 2-side cover leaves the base exposed.

H2: Explore More Mattress Protection Options

Full-perimeter sealing isn't the right fit for every bedroom, so a few other coverage styles are worth a look. Anyone wanting a cushioned, padded surface under their sheets can browse the [quilted mattress cover](#) instead of a flat sealed panel.

A [fitted mattress cover](#) suits budget-conscious buyers who just need a simple, everyday liquid barrier without a zipper. For a soft, absorbent, towel-like surface, the [terry mattress cover](#) swaps the cotton-blend weave for genuine terry cotton.

Every one of these styles, along with this zippered range, ships from Waterproof Mattress Cover under the same quality and delivery standards.

H2: What to Check Before You Buy

Three details decide whether a zipper cover fits well and lasts:

Mattress depth: Measure from the top surface to the base, including any padding, and compare it against the 10 to 12 inch capacity listed for each size.

Zipper placement: A zipper that runs along the base perimeter sits away from the sleeping surface, so it does not press into the body during the night.

Wash frequency: A household washing bedding weekly needs a tighter, snugger fit than one washing monthly, since a loose cover wears at the seams faster under repeated handling.

Seal Your Mattress Before the Next Spill Happens

Pick the 2-side protector for daily coverage or the 6-side encasement for full allergy control. Pay only after inspecting it at your doorstep, with cash on delivery to five major cities. Every size and color ships from [Waterproof Mattress Cover](#).

Customer Reviews

Ayesha Malik

I bought the 6-side encasement for my son's mattress after he had 2 accidents in one week. Zero smell, zero stain since then. The zipper stays flat and I don't feel it under the sheet at all.

Bilal Qureshi

Ordered the King size 2-side protector on COD. The delivery guy let me check the stitching before I paid, which is exactly what I wanted before spending on something for my bed. Fabric feels soft, not like plastic at all.

Sana Tariq

I have dust allergies and used to wake up congested every morning. Switched to the 6-side encasement 3 months ago and the difference is real, fewer sneezing fits at night. Wash it every 2 weeks on a cold cycle, and hold it up fine.

Usman Raza

Renting my flat, so I needed something to protect the mattress before I move out next year. The Queen size 2-side cover fits snug, doesn't slide around like the cheap fitted one I had before. Worth the money I paid.

Hina Farooq

Free shipping kicked in since I ordered the 6-side King size. It took about 4 days to arrive. My cat sheds a lot and used to jump on the bed, cover wipes clean, no smell trapped inside like the old cover had.

H2: Frequently Asked Questions

H3: What is the difference between a 2-side and 6-side zipper protector?

A 2-side protector covers the top and sides of the mattress. A 6-side protector, or full encasement, wraps and seals all six sides for complete coverage.

H3: Does the zipper affect comfort during sleep?

The zipper sits along the mattress edge, away from the sleeping surface, so it does not create pressure points or noise during normal movement.

H3: Can a zippered waterproof mattress cover go in a washing machine?

Yes. Wash it on a cold, gentle cycle and tumble dry on low heat, following the care label on the product.

H3: Which size fits a king bed?

A 72" × 78" cover fits a standard king bed in Pakistan, with a depth capacity of up to 10 to 12 inches.

H3: Does a zippered cover stop bed bugs?

A full 6-side zipper encasement creates a sealed barrier that blocks bed bug entry once zipped shut.

H3: Can I order a zippered waterproof mattress cover online in Pakistan?

Yes. Every size and style on this page can be ordered online, with cash-on-delivery shipping to major cities across Pakistan.
