

SAMPLE SCHOOL REPORT

2022 OST Analysis

Abstract

This report includes an analysis of OST scores for the 2021-2022 school year.
It was created using data provided in the Centralized Reporting System.

Introduction

The data in this report displays information from the OST Item Analysis extracted from the Centralized Reporting System, which began storing item analysis data beginning with the summer testing administration of 2021. All prior year item analysis data which was housed in the now decommissioned Online Reporting System (ORS) is no longer available. Due to operational field testing, ELA results are only available at the state level for the spring 2022 test administration.

Description of Reports used in Analysis

Comparison by Standard

Information in this table displays comparison (school/district/state) performance results by standard for the 2022 spring administration of the OST. Grouped by strand/topic and standard and separated by the number of points, the overall number of total questions and average performance results are displayed.

Writing Distribution Graph

This chart displays the average student performance on the writing section of the OST, broken down by rubric component.
