

## MAN AGITATES; NATURE PERFORMS

Have been noticing,  
Complaints abounds.  
Pandemic mandates aren't constitutional;  
Law enforcement isn't supported;  
Government too intrusive in our lives;  
Our taxes are wasted on hopeless causes;  
Children aren't taught properly;  
The elderly receives no respect.

Nature smiles;  
Sun rises and sets daily;  
Weather cycles without debate;  
Bears patiently wait to attack when we leave our garbage exposed;  
Raccoons know when to fish when pond is restocked;  
Skunks know when the cat food is left on the porch;  
Trees patiently wait out the draught;  
Birds fly above fire and storm.

I've found that patience, positive expectations eventually prevail;  
There's a solution to every challenge.  
Yet our complaints, negativity, agitations are self-fulfilling prophecies.
